There's a modern twist to old-fashioned cookin'. those wonderful electric appliances which let the home-maker do more things ... better ... and quicker!

An electric range, for example, takes the guessing out of good cooking. Once you establish a superior

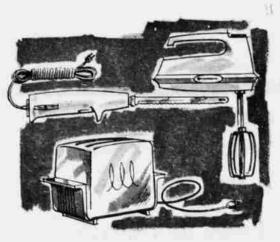

recipe, you can repeat it time after time because an electric range lets you select the "just right" temperature for every dish. Many new ranges have _____ thanks to low-cost rural electric power.

Kitchen Convenience '66

ances that make the home-maker's day easier and more efficient. Dishwashers take the drudgery out of that unpleasant chore . . . today's models hold all the dishes and utensils for family-size meals. An electric disposer unit enables you to "wash" the majority of your kitchen garbage down the drain.

Electric appliances make it simple to prepare special treats. Mixers are in daily use for a wide assortment of jobs from preparing your favorite cake to whipping potatoes. Tired of trying to cut meats with a dull knife? Try an electric knife sharpener or an electric knife . . . you'll soon be using it every day. An electric toaster? Why, does anyone still burn toast by using the oven?

Add all those wonderful electrical appliances together and you'll understand why you live better,
