Install ELECTRIC HEAT now... you'll be glad for years to come!

Now's a good time to think ahead ... think about the cold, wintry days (and nights) that will be here all too soon. What better time to install Electric Heat?

The warmth radiates down, just like the sun. This method gives maximum flexibility in home decora-

For ultimate comfort consider a combination electric heating and air conditioning unit. This single unit gives you complete year around climate control; heats your home in winter and cools it in summer.

Regardless of which electric heating system you install, you can be certain that your family will

COLORFUL HALFTIME shows have been enjoyed by Heppner High school basketball fans at games during the season just ended, but the one presented on the night of the Wahtonka game was among the most fun-filled, colorful and liveliest. The costumed drill team frolicked through humorous dances and brought considerable meriment. Debbie Young (left) and Paula Siewert are caught performing a routine while Rita Pet-tyjohn is visible at right in the background. (G-T Photo)

You'll be surprised how little it costs. That's because Electric Heat is so simple to install; no expensive duct work or furnace to buy. The whole job can be done quickly. There is so little fuss and muss that you can continue living in your home without interruptions.

Which Electric Heat system is best? Depends upon your home and your family. Many adding Electric Heat to an existing home prefer baseboard units. They are easy to install and require minimum alterations. Just run a few wires and connect to the heating units.

If you plan to remodel, consider ceiling cable. The heating elements are actually hidden in the ceiling.

enjoy a whole new world of comfort and convenience. You'll like the clean, steady warmth provided by Electric Heat. There are no "hot" or "cold" spots. It's safe because it's flameless. Electric Heat is a trouble-free system; just set the thermostat and relax to enjoy the modern heating method!
