

famous **ELGIN**  
cordless electric wall clocks

**CONTEMPORARY**  
Bold new way with brass and black. Thick and thin gold lines contrast against ebony leatherette... lead to spun satin dial with Arabic numerals, black hands. Neat brass finial completes one of the most exciting wall clock designs we've seen in many years.

"Something from the jeweler's is always something special."

Paint Blistering?  
Easy Cures Told

What causes paint blisters on house siding?

Blisters form because there's moisture inside the house walls, and it's pushing its way out, right through the paint.

There are three causes for the moisture. The most common is excess humidity inside the house. This is most easily cured by installing exhaust fans in the kitchen, bathrooms and laundry—the big moisture-producing areas of the home.

Outside leaks are a second cause of moisture in exterior walls. To cure them, be sure flashing is properly installed and in good repair.

Moisture also comes from the ground. The house, if it has no basement, should have 18 inches of ventilated crawl space between ground and floor. There also should be moisture seals on the ground surface and in the floor.

Check to be sure that the attic, if there is one, also is properly ventilated.

IN CASE OF FIRE

At home—  
Quickly get everybody out of the house.

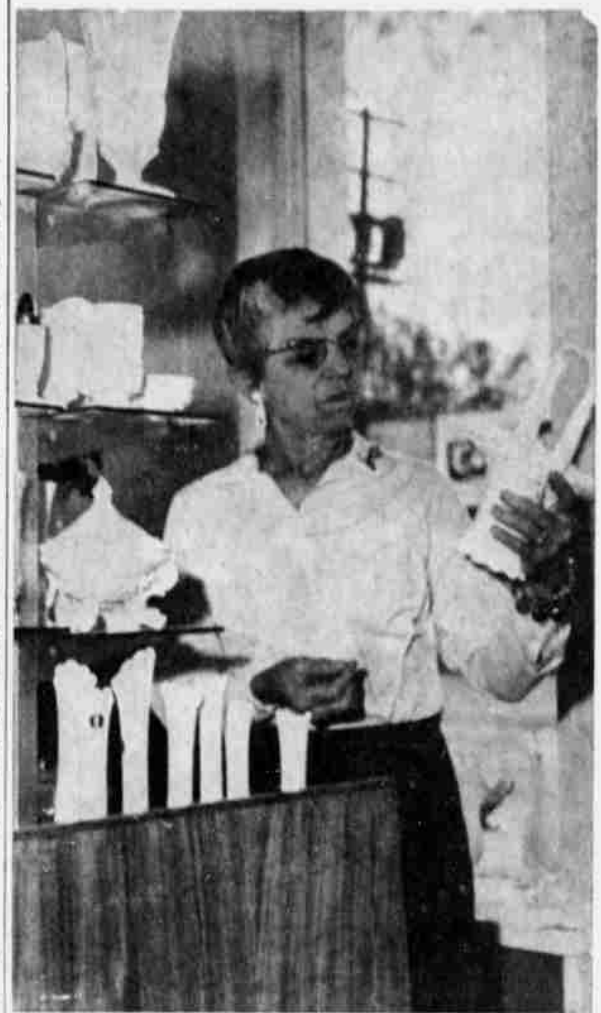

Call the fire department immediately.

(Be sure everyone in your family knows how to call the fire department.)

At public gatherings—

Walk, do not run, to the nearest exit. Call the fire department immediately. Keep calm.

—American Insurance Association

ACCENT PIECES of Westmoreland milk glass at Murray's Rexall Drug are shown here by Mrs. Roxy Lovgren, clerk in the store. Cherished by any homemaker, the milk glass pieces add both distinction and utility in the home. This is just one line carried by the drug store that will contribute to home improvement. (G-T Photo)
