

### ASC Committee Election Date Set; August 22 Deadline for Nominees

BOUNDARIES FOR the ASC community committee election, scheduled for September 18, 1967, are shown on this map. Boundaries have not been changed from last year, and the committee includes Alpine, Morgan, Ione, Lexington, Eightmile, North Heppner, South Heppner, Boardman and Irrigon. A slate of nominees will be selected by the present community committees. The county committee may add other nominees, and additional nominees may be added by petition if they are found to be eligible and willing to serve if elected. Petitions must be: 1. Limited to one nominee each. 2. Signed by at least six eligible voters in the community. (Eligible voters may sign as many petitions as they desire). 3. Received in the county office by August 22. Persons nominated should be currently engaged in the operation of a farm and well qualified for committee work. In general, a person is eligible to be a community committeeman if he lives in the community in which he is eligible to vote. If a person who is nominated by petition is found to be ineligible, he will be notified and given 15 days in which to appeal to the county committee.

### Wheat Program Provisions Told; Aerial Photos Set

Major operating provisions of the 1968 wheat program will be virtually identical to those in effect for the 1967 crop, according to David McLeod, office manager of the Agricultural Stabilization and Conservation Service office.

An important 1968 program provision detail different from the 1967 program is that the domestic marketing certificates—which are an important part of participating farmers' income—will be issued on an estimated 530 million bushels, reflecting the projected production on 40 per cent of farm allotments on the national allotment of 59.3 million acres.

For the 1967 crop, domestic certificates are to be issued to participating farmers on 520 million bushels of wheat, or 35 per cent of farm allotments based on the 1967 national allotment of 68.2 million acres.

Marketing certificates on the 1968 wheat crop—as for 1967—will be valued at the difference between full wheat parity (as of July 1, 1968) and the national average price-support loan level of \$1.25 per bushel. For the 1967 wheat crop, domestic certificates are worth \$1.36 per bushel, compared with \$1.32 per bushel for the 1966 crop.

Program provisions for the 1968 crop wheat which are identical to those in effect for the 1967 crop include (1) no acreage diversion program, (2) continuation of the substitution provision for wheat and feed grains for growers participating in both programs, and (3) continuation of the "excess wheat option" (whereby a producer can plant up to 50 per cent in excess of his allotment acreage and still be eligible for marketing certificates and price-support loans if the excess production is stored and other terms and conditions of the program are met).

A new flight of aerial photographs will be used for 1968 acreages, so all producers are urged to review photographs of his farm before making final seeding plans this fall.
