We tell students that the best way to get ahead in this world is to stay put.

Stay in school, complete your education. This is the way to a good job and all the rewards that come with it (and we don't mean just the financial ones). That is the message we put across whenever we go to high schools and counsel students on their careers.

Why do we do this? We realize that the greatest natural resource any country can have is its young people.

From their ranks will emerge our future leaders. So by helping them now, everybody (including us) will benefit later.

We believe that our career-counseling sessions, and the scholarships, fellowships and college grants we provide, are encouraging more young people to complete their education.

Standard Oil is trying to help young people discover more about themselves... and the world they live in.
