## Rural Electric People Help Build Payrolls In The City

Each year, rural electric people all over the nation buy more than a billion-and-a-quarter dollars worth of electrical equipment and appliances—and this is only a fraction of the annual total of goods and services produced in the towns and cities and bought by rural electric people.

Workers and businesses feel this rural electric purchasing power where it counts—in their pay envelopes and cash registers.

We are proud of the part we play in helping to keep this nation's economy strong.
