1. You are driving down the road and approach a steady red light with a green arrow. What should you do?

ANSWER: You may proceed cautiously without stopping in the direction indicated by the green ar-row. If you do not wish to go in this direction, then you must stop.

2. You are driving down the road and approach a flashing red light. Should you proceed with caution?

ANSWER: No. A flashing red light means the same as a stop sign. After you have brought your car to a complete stop, you may proceed if you can do safe-

A Breath of Fresh Air for American Industry

American industry is looking for a breath of fresh air. And, increasingly, it's finding it in the countryside.

That's partly because in the countryside there's electric power, provided by Consumer-owned rural electric systems, to turn the wheels of industry. And the people who built and own the rural electrics are there, too, helping provide local leadership and manpower

It's a big job.

It means coordinating state and Federal programs with rural needs. It means setting up job training programs and improved community facilities. It means consulting services for existing and newlyformed small businesses. It means imaginative planning for new industries and new communities.

The fresh air that industry is finding in rural America means progress and growth for all of us.
