JIM SHERMAN, GUARD

CARY DAVIS, HALFBACK

BOB DOBBS, TACKLE

Firemen Hear Talk by Phillips

Deputy Fire Marshall Stan Phillips of John Day, one of four fire marshalls for the State of Oregon in charge of giving instructions to small local departments, was a special guest of the Heppner Volunteer fire department Monday night, October 16.

A small number of volunteers from Lone attended the meeting and listened as Phillips spoke on the basic fundamentals of a small department. Most of Phillips' talk centered on a new training program of basic fire fighting that will be initiated after the first of the year. Phillips, or an instructor from BMCC, will be here at that time to conduct the program.

Directors Discuss Coming Ski Season

Directors of the Arbuckle Mountain Corporation met at a breakfast meeting October 6 and laid plans for the coming ski season.

They acted to pay some \$200 indebtedness against the corporation and discussed possibility of pushing season ticket sales to help finance operation for the coming season.

It is expected that 4-H clubs of Gilliam and Morrow county will again be active in skiing and Dick McElligott will be asked to take charge of this phase of the project.

The directors also discussed the ski patrol and Al Martin, active in the patrol last year, will be consulted on this aspect. W. C. Rosewall was in charge of the meeting.

Recent week-end hunting guests at the home of Mrs. Sara Adkins were her son and daughter-in-law, Mr. and Mrs. Earl Crismon of Beaverton, and her granddaughter, Mrs. Joe Hoosly and son Ronald Joseph, of Milwaukee. Mrs. Adkins reports that she has also had word from her

grandson, Ronald Earl Crismon, who is in the military service and is stationed in Munich, Germany. Crismon has recently been promoted to Staff Sergeant and reports that his outfit just returned from a 49-day field trip of an undisclosed nature.

PRETTY EFFICIENT.

The real beauty of the Trimline® phone is in what it can do. The dial is in the handset. So you can call from where you sit. There's a recall button in the handset too, so you can "hang up" and call again without reaching over to the base. There's a longer cord. The handset rests face down on the base, doesn't collect dust. And the entire unit takes up about half as much space as a regular table model phone. Makes beautiful sense.
