Everyone gives watches for Christmas

Why don't you be different?

ACCUTRON SPACEVIEW "0" Clear view dial arrangement, waterproof, sweep second hand, luminous hands and dots, black Python strap. \$125.00

ACCUTRON "223" Sweep second hand, luminous dots and hands, applied markers on dial, alligator strap. \$125.00

What's so special about watches, anyway? They're made up of mainsprings and hairsprings. Balance wheels. And a lot of other delicate mechanisms.

It's those things that make a watch run. Be it fast or slow. Or maybe not at all. So why give someone an ordinary watch? You could give an Accutron® timepiece instead. Accutron has no hairspring. No mainspring. No balance wheel. They've been replaced by a tuning fork.

The tuning fork does everything ordinary watchworks are supposed to do. Measure time. Only it does it more accurately.

By vibrating 360 times to a second. And sending the hands around the dial so precisely, we can guarantee monthly accuracy to within a minute. About 2 seconds a day. Could a gift be more perfect?

*When case, crown and crystal are intact.
 †We will adjust timekeeping to this tolerance, if necessary. Guarantee is for one full year.
