

Commission Talks Of Nuclear Plant

(Continued from page 1)

With the rapid growth of land in population areas, though, Kennedy said that the time is not far distant when it would require many more power lines to carry the power to them.

Peterson told how great progress is being made in the east in developing large blocks of power by nuclear fission. Plants range in size from 200,000 kilowatts to a million kilowatts, he said, the latter being the "most practical size." Power generation of such a plant of one million kilowatts is roughly equivalent to that of McNary or The Dalles dam.

Some of those in use in the Midwest burn coal for fuel, Peterson said, but others use uranium. A truckload of uranium is equivalent to a trainload of coal 21 miles long, he said.

Peterson said that an atomic bomb must have fissionable material of almost 100% but the thermal nuclear power plant needs to have only 3 1/2% of fissionable material.

Morrow Port Largest
Kennedy declared, in reference to the Port of Morrow, "There isn't another port site in the Northwest that compares in acreage, terrain or inexpensive land to what you have here."

He cited examples of other port efforts from Portland to Pasco and pointed out how much smaller in size they are.

Swanson, giving a summary of the financial condition of the Port of Morrow, said that it has 41,071 acres of land under deed now, including some lands in the desert area. These lands cost the port a total of \$144,993.65.

Average price of land acquired is \$35 per acre, he said.

He said that if it were decided to abandon the port commission any time that all the tax money spent could be recovered, and "we could probably donate some back to the county."

Through the eight years that the port has been on the tax rolls, a total of approximately \$45,000 has been spent in operating costs. Taxes paid to the port have averaged \$31,000 per year with a total of \$248,000 being collected. Cash on hand in the bank stands at \$98,845.11 at the present time, Swanson said.

Dewey West, chairman of the commission, had opened the panel discussion with a review of the port's history.

"When I first came here they told me that the north end was God's country, because no one else wanted it," he said. "That's not true any more."

Two Still Serve

West explained how the possibility of the port started in discussions in 1958, resulting in its eventual formation. Two, Swanson and West, remain on the commission from the original five. Others were George Wiese of Boardman, Warren McCoy of Irigoin, and the late Al Lamb of Heppner, who served until his death two years ago.

The commission has held 214 meetings, West said, as well as doing considerable other work in land acquisitions and taking care of other business. He said that he figured that those who had worked on the commission through the 10 years had spent 860 hours in meeting time.

West said that he felt that there is "wonderful opportunity" in Morrow county. The port is working on waterfront sites and bringing industrial people to them. At the same time it is seeking to expand its lands. For some time the commission was a port without access to water but trades and acquisitions now have established sites on the river bank.

He told how W. C. Rosewall and County Judge Paul Jones had gone to Washington, D. C., and proved so effective in getting some lands restored for future industrial development that had been condemned by the Federal government for a wildlife refuge. He commended them highly for this work.

West also had high praise for Kennedy who has assisted the port on many occasions. "He has been right there, ready and handy, whenever we needed him," the port chairman said.

Departments Named
Members of the commission have been assigned responsibilities as "department heads" under a new plan. West said. Larry Lindsay is in charge of port lands, Peterson is in charge of promotion, Swanson is in charge of finance, and Dick Krebs is in charge of public ports and docks.

Lindsay, speaking impromptu at the conclusion of the discussion, told how important he thought the port development is to the county. He pointed out that most of those serving on the commission are farmers and suggested that many may wonder why farmers are interested in port development and industry.

Citing the example of the proposed nuclear plant, Lindsay said that if a development of this magnitude came to the

county it would broaden the tax base by 170%, based on the estimated cost of establishing the plant. This would result in savings of taxes of two-thirds on the land in the county, he declared.

Swanson spoke briefly of the commission's efforts to attract a Dow Chemical plant on a port site.

"I don't know how we stand with Dow Chemical," he said. "I think we may be out of the running, but we don't know for sure."

The factor involved that may have lost the plant is that the Port of Morrow is located 17 to 20 miles from McNary dam and out of the 15-mile bus bar power range.

Bus Bar Rate Explained

Krebs was called upon to explain the bus bar power rate, which simply is that power is offered at a considerably cheaper rate to plants locating within 15 miles of hydro-electric project because of the savings made in eliminating long transmission.

Swanson said that he felt the port commission had every other advantage to offer the chemical company.

The panel from the port commission was invited to participate at the conservation meeting because of the broadening concept of conservation and the close tie afforded through the common interest in irrigation.

Ray French, chairman of the supervisors of the conservation district who presided at the meeting, emphasized Kennedy's point on the need to have industry to provide jobs for local youth. French said that of his Heppner High school graduating class, which numbered 18, only one other besides himself, remains in the county, the others finding it necessary to go elsewhere to make a living.

ANDREW G. HANNERS

State Director On Alcoholism To Appear Here

Andrew G. Hanners, executive director of the Oregon Council on Alcoholic Problems, Portland, will be in Heppner during the week-end to appear as guest speaker before church and community meetings.

Mr. Hanners is recognized throughout the western states as one of the "most brilliant" speakers on alcohol education, based on a 12-year background of active work and leadership in temperance organizations.

He will give the morning address at the 11:00 a.m. worship service at the First Methodist church on Sunday, February 11.

Earlier in the morning, he will meet with the Christian Men's Fellowship at their breakfast at 7:00 a.m. in the basement of the Heppner Christian church.

On Monday, Mr. Hanners will speak to students at an assembly at Heppner High school and at noon will appear at the Chamber of Commerce luncheon.

An ordained minister in the Church of the Nazarene, he is a native of Nebraska, has been pastor of churches in Idaho, Washington, California and North Dakota, and has served as an associate director of Loma Linda Institute of Scientific Studies for the prevention of alcoholism, Washington, D. C., since 1965. He served as Director of Education for California Council on Alcohol Problems from 1954-66, and has been instrumental in workshops with faculties in western colleges.

Under his authorship, many articles have been published and a church study guide, "Alert Your Conscience" was published and used for filming on television programs. In March, 1966, Mr. Hanners was one of 37 alcohol-education consultants invited to assist the Health, Education and Welfare committee of the Government to examine alcohol education in the public schools.

He makes his home in Portland with his wife, Rachel, and three daughters.

Ekstrom Dealer For Trailer Lines

Ekstrom Farm Chemicals of Ione has been appointed dealer for Nomad trailers, Herb Ekstrom, Jr., announces. The line offers trailers 17 1/2 to 24 1/2 feet, all self-contained.

In addition, the firm will handle Golden Falcon trailers from 15 feet in length.

The dealership is in addition to the other services and products that will continue to be handled by the business.

One of the Nomads is now on display at Ekstrom Farm Chemicals, and the public is invited to come and inspect it, Ekstrom said.

Heppner Investors Consult Council On Zoning Change

Heppner Investors Corporation, with Jack VanWinkle as spokesman, at the regular city council meeting Monday night sought advice on procedure for obtaining a change of zoning for property the corporation owns above Pioneer Memorial hospital.

The corporation owns a tract of some 16 acres that is now zoned as an agricultural area.

Since the group is considering development of some six or seven acres by subdividing it for home sites, it sought advice on how to implement a change of zone to residential area.

The procedure was outlined to VanWinkle and LeRoy Gardner, who also was present to represent the investors. The corporation will first apply for the zone change to Mrs. Elaine George, recorder, after which it will be considered by the planning commission for recommendation.

The corporation is also investigating the possibility of obtaining water and sewer service for the area. Since the tract is above city reservoirs, it was decided that it would be more feasible to obtain water from the county reservoir, if permission can be obtained from the county.

Mayor W. C. Rosewall said that he felt that problems involved can be worked out if the corporation wishes to develop the area, since the city wants to encourage building.

VanWinkle said that there is a dedicated street running behind the hospital but it is unimproved at the present.

Church Property Offered
A communication was read from Robert Wolfe, pastor of the Assembly of God church, stating that the church property at the corner of Willow and Gale street may be available for purchase soon at a reasonable price. He suggested that the council may wish to consider it for purchase since it adjoins the fire department building, and he offered to meet with representatives of the city to discuss the possibilities.

Mayor Rosewall said that he understands the Assembly of God plans to build a new church on another site.

The matter was referred to the city service committee for consideration.

Permit Granted
Application for a permit by Dale Munkers, son of Mr. and Mrs. Don Munkers, to keep four rabbits was granted. Permits were also granted for annual parking stickers for delivery trucks to 10 firms.

First reading of an ordinance to amend ordinance 282 on the dates and times of council meetings was passed by the council. The council has been meeting at 8 p.m. but it was discovered that the original ordinance sets the time of 7:30 p.m.

The amending ordinance sets the first Monday of each month as the regular time of meeting, except when it is a legal holiday. In such a case, the meeting will be on the ensuing night.

All meetings, stated or special, shall be open to the public, the ordinance reads.

Gene Pierce and Pirl Howell were reappointed to the city budget committee. Their previous terms expired February 1.

Greater Oregon Eyes 5-5 Split

Since both Vale and Nyssa high schools have announced that they must withdraw from the Greater Oregon athletic league in football if the voted round-robin schedule is followed next year, there is a good possibility that the league will compromise on an eastern and western split of five teams each.

Dick Carpenter, Heppner High principal and district chairman, said Tuesday.

Carpenter; Ron Daniels, Morrow county school superintendent and a member of the Oregon School Activities Association board of control; Principal Stan Cowen of Wahatonga; and Joe DeMarsh, superintendent, principal of Sherman County, comprising the district committee, met in La Grande Monday with Principal Jerry Camman of Vale and Principal Gene Chester of Nyssa.

Both Chester and Camman said that they would not be able to meet the round-robin schedule and would withdraw from participation if it is followed.

As a compromise, they were asked if they could meet a 5-5 split. Neither made a decision at the time, but both agreed to decide and call Carpenter by Wednesday. They said that such a plan would require adjustments in their schedules with Snake River Valley schools.

If they agree to the two five-team divisions, a district meeting will be called for next Wednesday in John Day to vote on the matter. Carpenter believes that the motion would be approved, 8 to 2.

However, if Vale and Nyssa decide that they cannot participate in the 5-5 plan, a district committee meeting will be held Wednesday at Boardman for drawing up a round-robin football schedule among the remaining eight teams. Nyssa and Vale in this case would be out of Oregon competition in football.

Nyssa and Vale, being much closer to Idaho schools than they are to Oregon competition, are reluctant to give up their Idaho ties and have the difficult decision to make.

HOSPITAL NEWS
Patients who were admitted to Pioneer Memorial hospital during the past week, and are still receiving medical care, are the following: Natalie Rauch, Heppner; Joyce Cross, Heppner; Ardith Hunt, Lexington; Arthur Smith, Heppner; Belinda Gregg, Heppner; Mary Glavey, Heppner, and Doris Stubbiefield, Kinzua.

Those who were dismissed, after receiving medical care, were Donna Springer, Heppner; Frank Engleman, Ione, and Frank O'Dell, Condon.

Mr. and Mrs. Marion Biddle, Heppner, are announcing the birth of their second daughter on Tuesday, February 6. Her birth weight was 8 lb., 3 oz., and at press time had not been named. She joins a sister, Sonja. Grandparents are Mrs. Peggy Davis, Walla Walla, Wash.; Lee Davis, Troy, Mont., and Mr. and Mrs. Les Brannon, Heppner; Great grandparents are Mrs. Ellie Likes, Walla Walla, and Mrs. Nelson Davis, Whittier, N. C.

Hustle Accounts For Jayvee Win

By DEAN KINDLE

A losing streak was finally broken by the Heppner Jayvees when they downed the Madras Jayvee Buffs 72-54 at Madras on February 2.

They have been told all year by their coach that if they beat the other team down the floor, they would get the easy basket. They finally did this and made many easy shots and lay-ins pay off in their favor.

If the Jayvees work in the coming games like they did against Madras, there should not be another loss.

Top scorer for the Heppner team was Pat Kilkenny with 28 points. A good percentage of these came from layins.

The Heppner lads outscored their hosts in every quarter, with the half-time score reading 33-17.

From the gift line the Heppner squad hit 20 of 33 attempts while Madras hit 14 for 37 tries.
