Cardinals Notch Pair of Victories In Weekend Tilts

Ione High had a cliff hanger on its hands Friday night when the Cardinal basketball team edged McEwen of Athena at Ione, 38 to 37, but the Redbirds found the going easier Saturday night when they bumped Stanfield there, 63 to 40.

The McEwen game was a see-saw battle in the second half. McEwen took the lead by one point with a minute and 15 seconds to play. Ione missed a free throw and the Scotties rebounded and went into a stall. Eddie Sherman intercepted a pass and threw to Frank Halvorsen on a fast break. Halvorsen made the bucket with 30 seconds to play.

Athena worked for one shot, but Beamer of the Scotties was fouled. He made the first try, missed the second, and Halvorsen rebounded with 30 seconds left, the score being tied at 37-all.

Mustangs Corral Enterprise Five In 83-71 Triumph

In a high-scoring basketball game on Heppner High's home court January 11, the Mustangs corralled the Savages from Enterprise, 83-71.

The Enterprise free throw shooting in the losing effort was phenomenal. The Savages shot a fantastic 88.5 at the charity stripe, but the Mustangs weren't far behind, making 67.7 per cent of their attempts. The difference came in Heppner's much higher field goal percentage. The Savages hit 31 of 35 chances at the free throw stripe. Heppner canned 21 of 31. Heppner hit 31 of 78 field goal tries, and Enterprise made 20 of 74 for percentages of 40 and 27 respectively.

The HHS Jayvees jumped to an early lead over the visiting Jayvees in the preliminary, going on to run roughshod over them, 67-42.

The baby Mustangs outscored the Savages in all four quarters. The big difference in the foul-studded game came on field goals, again, as the Mustangs canned 23 to Enterprise's 14.

Due to the fast and furious pace, Enterprise was reduced first to four, then to only three players in the last few minutes. The rest of the 10-man squad had gone out on fouls. Leading scorer for Heppner was John Hall with 17.

Two local men, Rod Murray and Max Barclay, returned last Sunday from a four-day trip to Fresno, Calif., where they went last Wednesday to deliver three mares, belonging to them, which are to be entered in training for the coming track season, which begins in April.

Attends Convention

The Rev. H. E. Preston of the Heppner Seventh-day Adventist church left Sunday for Cannon Beach to attend the North Pacific Union Convention of the denomination. Included at the convention are churchmen from Oregon, Idaho, Washington and Montana. Meetings continue until Thursday noon. While he is attending the convention, Mrs. Preston is visiting with their son-in-law and daughter, the Rev. and Mrs. R. W. Heinrichs, at Hermiston.

THE MODERN WAY TO HEAT

One of these ELECTRIC HEATING methods is best for you

Baseboard units simple to install. Ideal for re-modeling or new homes. There's no fuss or bother when you install Electric Heat. The job is done quickly and economically. That's because there are no expensive chimneys or duct work. Baseboard and wall units are ideal when you remodel. They can be installed as easily and quickly as a light outlet — no mess, no bother.

Most importantly, you'll be treating your family to a new level of comfort and convenience. The temperature is controlled in each individual room. Electric Heat is as quiet and as safe as a light bulb; no flames or fumes to worry about; no smoke or soot to dirty your home.

Ceiling cable system is invisible. Ceiling cable makes decorating and furniture arrangements easier because all the heating elements are

hidden in the ceiling. Furniture can be placed anywhere because floor or wall space isn't needed for the heating units. Ceiling cables are stapled to plaster laths or dryboard and then covered by plaster or dryboard. The heat radiates down... just like the sun shining from above. Thermostats control the temperature in each room so you always have the most comfortable degree of warmth. Ceiling cable is safe, clean and the most convenient way to heat your home.

Many folks install it in the bathroom floor. Feels wonderfully warm and cozy to barefeet on wintry nights!

Heat pump for year-around climate control. A heat pump is both a heating and air conditioning system. During the

winter, it heats your home; in the summer, the cycle is reversed and your home is cooled. This gives you real "climate-controlled" living. You merely set the thermostat for the "climate" you want and relax to enjoy all the comforts of total-electric living.

Installation is slightly more expensive than other heating systems but much less than the cost of two separate systems for heating and air conditioning. A heat pump costs less

to operate than other separate heating and air conditioning systems, too.

Plug in extra warmth with an electric heater. Portable electric heaters are great when you want to heat small areas in a hurry or provide extra warmth on special occasions. Many folks use them in work shops or in basement areas.

They're particularly welcomed on cold mornings to "take the chill" out of the bathroom. Senior citizens find them wonderful to give a little extra heat for their added comfort.

Regardless of which Electric Heating system you choose, you can be sure your family has the most modern, most comfortable heating method available. It'll give you new peace-of-mind because Electric Heat is so safe. And it's dependable and economical because of low-cost rural electric power.

Whether you build or re-model, discuss your plans with the Heating Specialists at your rural electric cooperative. They have experience and ideas because they've helped so many families with problems just like yours. Proper planning of a few details, such as installing adequate insulation, will make a big difference that can save you money and make your home even more comfortable. There's no cost or obligation. Call or visit your rural electric cooperative soon!
