There's just one thing worse than finding out about cancer.

Not finding out.

Sure, finding out is a shock. But finding out gives you a fighting chance. And the earlier cancer is found, the better the chances of beating it.

There's one certain way to lose to cancer. And that's not to find out. Until it's too late.

The thing to do is to have your physician give you a good going over now, when you feel great. Then when your doctor tells you that you are great, you'll feel even better.
