The clean 22: A Remington "Hi-Speed" with its "golden bullet." Clean because every "golden" bullet is coated with a specially formulated high-temperature lubricant. Unlike ordinary grease-coated bullets, it shuns dirt, grit and lint like the plague. Prevents these particles from reaching your gun to cause a jam or misfire.

So every "golden" bullet goes into your chamber clean, sizzles out of your barrel with full power. (A "Hi-Speed" 22 has more velocity at 50 yards than ordinary 22's have at the muzzle).

We originally developed the clean 22 to make 22 automatics feed smoother and surer.

(Which it does in fine style). But you'll also find that a Remington "Hi-Speed" with its "golden" bullet is powerful medicine in any action.

There's a special plating that resists nicks, scrapes and scratches. Gives you all the accuracy you paid for.

And exclusive non-corrosive "Kleanbore" priming. It can add years to the life of your barrel.

All for the same price as ordinary grease-coated 22's. In shorts, longs or long rifles, solid or hollow point.
