LET'S PAVE HIS ROAD WITH HOPE AND OPPORTUNITY

The swift young feet of America must not be slowed by stumbling blocks heaped on a base of too little opportunity. America's rural electric systems have taken the lead in helping develop programs to make life better for the rural community — to combat poverty, to bring in new industries, to improve community facilities — to smooth the road for tomorrow's leaders. It's a big job. It's a job for everyone who is concerned about our country.
