

# IRRIGATION...

**Offers promise for  
Morrow county's dry  
farmland.**

**It transforms sandy,  
dry soil into land  
for truck crops --  
Potatoes, Beans and  
Corn.**

**It increases yields  
on crops already es-  
tablished.**

**It offers benefits to  
Morrow county that  
are beyond analysis.**

... Wheels of Irrigation Progress Put in Motion

The earth's total water supply is large and unchanging, yet the supply of fresh water within the economic reach of man for agricultural purposes is only a tiny per cent of the earth's total supply. Believing that irrigation is the key to an increase in Morrow county's agricultural economy, the Gazette-Times is proud to present this special irrigation section, offering information relative to irrigation and the great possibilities it affords the area. We take pleasure in recommending the businesses whose services are offered in this issue, for they are helping Morrow county grow as they work. They have studied Morrow county, and know its particular problems. Their services are the results of these studies.
