# Record-Breaking Fish Runs Tallied

Excellent spring chinook sport fishing on the Rogue and Umpqua rivers enjoyed by enthusiastic anglers earlier this year augured well for good runs of fish moving to upstream spawning beds, but counts over Gold Ray Dam on the Rogue and Winchester Dam on the Umpqua exceeded the most optimistic predictions of Game Commission fishery biologists.

This is the report from biologists Bill Haight at Grants Pass and Jerry Bauer at Roseburg, who said that the runs which have passed the counting stations have far exceeded any previous runs since the counting stations were established more than 25 years ago. Although the runs are normally about 90 percent complete by mid-July, both biologists said that the big springers continue to pass the counting stations in good numbers.

On the Rogue, Haight said that so far this summer more than 56,400 spring chinook have been tallied at Gold Ray compared with last year's run of about 21,300 fish. Butte Falls Hatchery fish are showing well in this record-breaking run. The previous high count on the Rogue was 49,500 chinook recorded in 1965.

Summer steelhead are just now beginning to pass up the Rogue in good numbers, according to Haight, with about 1,500 tallied to date. He said the run is much earlier than usual.

On the Umpqua River, Bauer reported that more than 20,300 spring chinook have passed Winchester Dam, almost double the previous high count of 11,700 chinook recorded in 1965. More than 45 percent of the big springers are marked fish which originated from the Commission's Rock Creek Fish Hatchery. Biologists say the more than 9,000 marked fish in the run indicate a fantastic survival of hatchery-reared spring chinook, the most difficult of all salmon to raise.

Bauer also reported that the summer steelhead run in the Umpqua is one of the best ever with almost 6,900 ironheads counted through the ladder to date. Of the steelhead tallied more than 65 percent are marked fish from Game Commission plants. The previous high count of summer steelhead at Winchester was made in 1966 when 6,200 moved through the ladder to upstream spawning beds.

# Highway Money Goes To 227 Oregon Cities

The semiannual apportioning of the State Highway Fund to the incorporated cities of Oregon is being accomplished by the State Highway Division, it was announced August 6 by Forrest Cooper, state highway engineer.

Funds approved for release by the State Highway Commission total \$5,719,625.80, which is being distributed to 227 incorporated cities having a population which now totals 1,139,826. The allocation is based on the statutory 12 percent for the period January 1 through June 30, 1969.

The funds come from the following sources: motor vehicle registration and operators' license fees, gasoline tax, use fuel tax, motor carrier fees, and fines and penalties collected for violations of the size and weight statutes where complaints are made by the Highway Division weightmasters.

Sixty-seven Oregon cities will receive sums totaling \$10,000 or more.

# Pornography Bill Backed by Senator

A bill which seeks to prohibit the sale of pornography to minors has received the backing of Oregon Senator Bob Packwood.

"There is legal precedent which leads me to believe that this bill will be upheld by the courts in the event it is challenged," Packwood said. "This was a primary consideration in my deciding to support the proposed legislation."

"Basically the bill defines pornography in terms of its effect on minors. It sets criminal penalties for selling or exhibiting obscene material to minors while protecting the rights of the accused by requiring a criminal jury trial.

"It also permits the sale of such materials to minors accompanied by a parent or legal guardian and to schools, museums and libraries."

Sheridan Wyman spent Friday through Monday, August 8-10, visiting her mother, Mrs. Eileen Wyman and other relatives. Miss Wyman is a student at Emmanuel School of Nursing in Portland, from which she will graduate next June.
