### Soaring Champ to Texas

Mrs. R. E. Rands has received word that her son-in-law, Rudy Allemann of Richland, Wash. is to be one of four pilots selected by the Soaring Society of America to represent the United States in the 1970 World Soaring Championships at Marfa, Texas June 21-July 4.

This is the first time a pilot from the Pacific Northwest has been selected for the World Soaring Championships, and the first time the championships have been held in the United States. Pilots from over 30 countries, including Poland and Russia will compete in this international event.

Allemann, who is the current Pacific Northwest soaring champion, has held every open class soaring space record in the state of Washington. He was selected in balloting by the top ten soaring pilots over the past two years in the United States.

The World Soaring Championships are considered the Olympic Games of Soaring.

Allemann, who finished fourth in the 1969 Nationals at Marfa earlier this year after leading at one point in the contest, is the only rookie on the U. S. team.

Allemann's soaring enthusiasm for 11 years, has competed in six Nationals. He finished in the top 10 five times. The only year he didn't place was 1963 when his sailplane was extensively damaged in a landing mishap at the Nationals.

Allemann has flown his fiberglass Libelle sailplane at speeds of 130 miles per hour. He has also flown 520 miles on a straight line course. The world record is 650 miles. He has been towed to 1,000 feet, and then soared to 29,000 feet. At that height, oxygen is part of the pilots equipment.

Allemann's chief crew members are his wife Mary Ann and son Bill, age 6, and daughters Susan 5, and Virginia 4.

**Thanksgiving dinner guests** at the home of Mr. and Mrs. Howard Bryant were Mr. and Mrs. Arthur Vance, Mrs. Madge Bryant and Mrs. Izora Stingle. Barbara Jessmer and family were called to Eureka, Calif. recently by the death of her nephew, Sean McGill, 5. The little boy was killed in an accident. Memorial services were held there Nov. 23.

**PREVENT THOSE WINTER DRIVING WOES**  
The Safe Winter Driving League presents this tip for safer winter driving from the National Safety Council: "Tests show that reinforced tire chains provide four to seven times as much pulling ability on snow and ice as regular tires without chains." Always carry chains in the trunk of your car to assure your ability to get through regardless of the weather.

## Trappers Take In \$751 in 1968-69

Trapping, like some other pioneer-type pursuits, is rarely thought of in this modern day. However, it is still done and three Morrow County trappers brought in some \$751 worth of fur last year.

Report was for last year and this year should see a healthier total as fur prices are reported as improving. Last year there were 8 mink caught at an average price of \$8.28. 20 muskrats brought in only about 90 cents each. 38 beaver were caught and the average was

\$15.11. 7 raccoons brought \$3.91 each.

Bobcats are pretty popular now and last year 3 were caught and brought \$17.21 each. Coyotes, not as plentiful as in the past, bring about the same average price as many years ago and 2 were caught, bringing about \$6.82 each.

You don't have to stay awake nights to succeed. Just stay awake days.

## Nalbro Cox

### Advanced in Rating

Aviation Machinist Mate Third Class Nalbro L. Cox, USN, son of Mr. and Mrs. Bernard L. Cox of Lexington, was advanced to his present rate while serving with Training Squadron Three at Naval Air Station, Milton, Fla.

His advancement was based on time in service and rate, military appearance, performance of duties and his score on the Navy-wide test for promotion.

Mrs. Burton Peck and son-in-law, Paul Morey were dinner guests recently at the Don Peck home at Pilot Rock.

## Library Needs Books

Ruby, Alaska, a remote Indian village on the Yukon River, wants a library. VISTA volunteers Mr. and Mrs. Joseph A. Mahhan are asking for donations of fiction and non-fiction paperback books suitable for adults. Needed mostly are westerns, mysteries and novels.

Anyone who has books to give the library may drop them off here at the Christian Church or call Rev. Don Johnson at 676-9209.

Carl Bauman visited his parents, Mr. and Mrs. C. J. D. Bauman, in Heppner over Thanksgiving. Carl is attending the University of Oregon in Eugene after having served some time in the service.

# One of these ELECTRIC HEATING methods is best for you

**Baseboard units simple to install: Ideal for re-modeling or new homes**  
There's no fuss or bother when you install Electric Heat. The job is done quickly and economically. That's because there are no expensive chimneys or duct work. Baseboard and wall units are ideal when you remodel. They can be installed as easily and quickly as a light outlet—no mess, no bother.

hidden in the ceiling. Furniture can be placed anywhere because floor or wall space isn't needed for the heating units. Ceiling cables are stapled to plaster laths or dryboard and then covered by plaster or dryboard. The heat radiates down... just like the sun shining from above.

Thermostats control the temperature in each room so you always have the most comfortable degree of warmth. Ceiling cable is safe, clean and the most convenient way to heat your home.

Many folks install it in the bathroom floor. Feels wonderfully warm and cozy to barefeet on wintry nights!

**Heat pump for year-around climate control**  
A heat pump is both a heating and air conditioning system. During the

**Plug in extra warmth with an electric heater**  
Portable electric heaters are great when you want to heat small areas in a hurry or provide extra warmth on special occasions. Many folks use them in work shops or in basement areas.

They're particularly welcomed on cold mornings to "take the chill" out of the bathroom. Senior citizens find them wonderful to give a little extra heat for their added comfort.

Regardless of which Electric Heating system you choose, you can be sure your family has the most modern, most comfortable heating method available. It'll give you new peace-of-mind because Electric Heat is so safe. And it's dependable and economical because of low-cost rural electric power.

Whether you build or re-model, discuss your plans with the Heating Specialists at your rural electric cooperative. They have experience and ideas because they've helped so many families with problems just like yours. Proper planning of a few details, such as installing adequate insulation, will make a big difference that can save you money and make your home even more comfortable.

There's no cost or obligation. Call or visit your rural electric cooperative soon!

Installation is slightly more expensive than other heating systems but much less than the cost of two separate systems for heating and air conditioning. A heat pump costs less
