BUCKETS ARE PART OF THE PAST

The people of America's rural electric systems know their job is a continuing one.

While we made the kerosene lamp a family heirloom in most rural homes, we know that some rural communities are still without dependable, pure water.

As rural America grows, rural communities face different needs. In one, it may be water . . . in another, houses or jobs.

Across the nation, America's rural electric systems are helping to meet these needs.

We are working in our community—we are committed to our community's progress and future
