NEW INTERNATIONAL 990 MOWER CONDITIONER

Greater capacity...
Operates with less power...
Requires less adjustment...
than any other mower conditioner

Operate in heavy hay or sudax a gear faster. Full-width conditioning rolls eliminate dead spots that waste power. And you'll find there's no power loss due to side draft on hillsides or on the level.

You get increased capacity because larger diameter 44-inch reel is less affected by changing crop conditions. And, the unique position of the reel bats holds the crop flat so it feeds through the conditioning rolls, without hesitation. What's more, controlled platform float and self-compensating roll pressure lets you move from field to field, crop to crop and rarely ever readjust the 990.

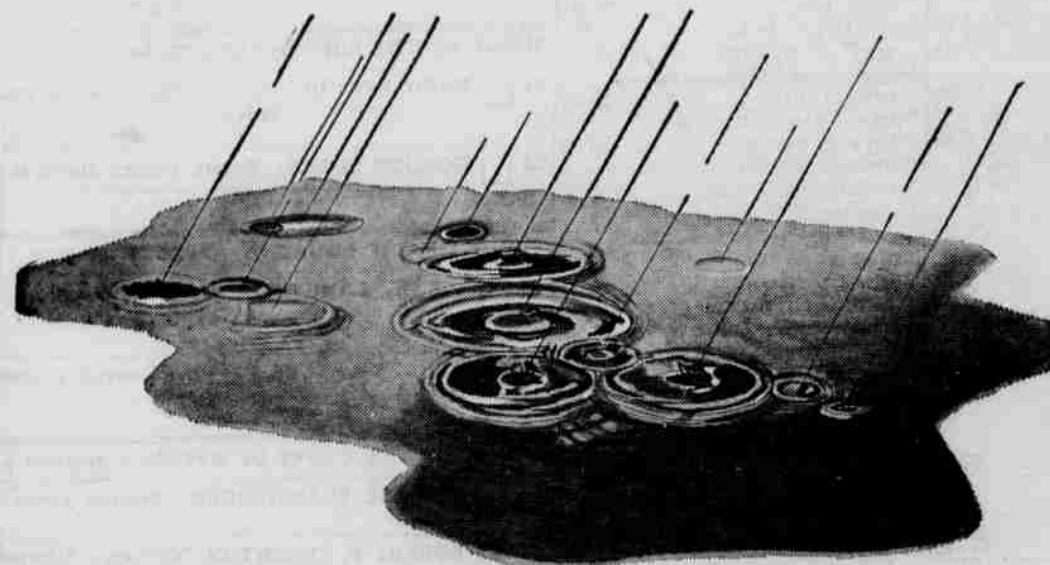

Be sure and see us for your Hay and Equipment needs, including Windrowers, Balers and Farm Hand Bale handling equipment.
