1971. Buick introduces a new set of values.

Value, not gimmicks or ornamentation, sells cars. More people have been coming to Buick each year for just that reason. Buick concentrates on value. And this year, Buick introduces a new set of values. Features that will help make your new Buick perform better,

last longer and get you more of a return on your investment at trade-in time.

Only a Buick dealer can offer you our new set of values. So, test your values against our new ones. Then ask yourself this simple question. Wouldn't you really rather have a Buick?

Something to believe in.

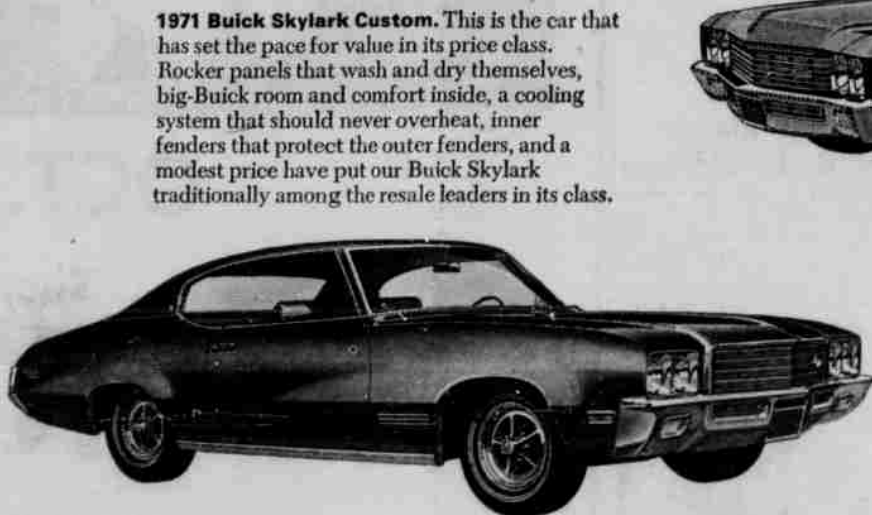

1971 Buick Riviera. A totally new design concept. And that's not all. Riviera offers MaxTrac, an exclusive power control system you can order with its own on-board computer. It helps you get securely over slick surfaces by reducing rear-wheel slipping. The new body features side-guard beams for protection, a bigger trunk, and a driver cockpit with a control center designed around the driver for new ease and convenience.

1971 Buick Electra 225. A new interpretation of quiet elegance. We've improved our Electra everywhere you look. There's more room in every direction, interiors that can be appreciated as much for their durability as for their beauty and comfort, even a new balanced braking system. A unique valve proportions braking force front to rear to help give you quick, smooth straight-line stops.

1971 Buick Centurion. This is our newest Buick, a city car with sleekness and grace as well as muscle. It features more nimble variable-ratio power steering, power front disc brakes, Full-Flo ventilation, and a vinyl roof on the Centurion Formal Coupe as standard equipment.

1971 Buick Skylark Custom. This is the car that has set the pace for value in its price class. Rocker panels that wash and dry themselves, big-Buick room and comfort inside, a cooling system that should never overheat, inner fenders that protect the outer fenders, and a modest price have put our Buick Skylark traditionally among the resale leaders in its class.

1971 Buick LeSabre. An incredible new offering of Buick value. The LeSabre, like the Riviera, Electra and Centurion, features AccuDrive, a new version of the directional stability system we pioneered. It will help give you smooth handling.

An important improvement. Every new Buick engine is now designed to run smoothly and efficiently, and with lower exhaust emissions, on no-lead and low-lead gasolines. And every Buick V-8 engine will have exclusive nickel-plated exhaust valves for smoother operation and longer valve life, and a new time-modulated choke to help give quicker warm-up and a more consistent fuel mixture.
