### Igran® for growers determined to make more money in wheat...

Apply Igran herbicide before or after wheat emerges and cut the weeds right out of the competition for moisture and nutrients... tough weeds that can escape your 2,4-D or MCPA treatment. Like gromwell, henbit, tarweed, purple mustard, dogfennel, speedwell, chickweed, Pacific meadow foxtail and others...

Even cheatgrass can be controlled under certain conditions by Igran. And all the moisture and nutrients go toward building wheat yields.
