**Scientist Tells Lions Of Power Need**

(Continued from page 1)

tivity and this will amount to almost zero except for tridium in water which has almost no effect on the body.

He explained that excess heat must be gotten rid of at the nuclear plants. Water is taken from a river, lake, bay or ocean. This is used to cool the condensers. Excess water then goes directly into a river, a tower or pond for cooling.

The Hanford plant showed better fishing where the excess water went into the river.

He showed a plan utilizing a reservoir at Sand Hollow for storing the coolant water from the plant. This would then be used to irrigate some 100,000 acres of land south of Sand Hollow reservoirs.

He urged all to study AEC published proceedings showing the safety records and exposure levels.

He pointed out that the coolant water does not go through the reactors. It simply cools the condensers after the steam or boiling waters go through the turbines.

He explained that the used up or spent rods are stored in cement in 55 gallon drums and buried at certain storage sites in the ground or in salt mines.

He said there is more radiation from X-ray machines than from living next to a nuclear power plant.

Nuclear power will be the cheapest thermal power method. Costs of all other types of power production are gradually going up.

Following his talk, he answered a number of questions from his audience, mostly concerning safety.

Rupert Kennedy, manager of the Port of Morrow, told of the "Sanctions" program of which this was the first informational meeting.

He said they will schedule speakers for meetings at Boardman and Heppner.

The Port of Morrow will publish information and will record the reactions and sanctions of the thoughts of the people of Morrow County. This will be done over the next three months. Results will be made available to prospective power utilities.

The Port Commission will appear at a state nuclear evaluating meeting Friday at Salem.

He said that nuclear power plants cost \$325 million and would add much to the assessed values of the county, besides the irrigation grid of highly valuable row crop land from the coolant waters.

Kenneth Smouse announced that the Saturday Pomona

Grange meeting at Ione would have two interesting movies in regard to nuclear power and safety.

**Dale Boner Studies in Utah**

Dale Boner, District Conservationist, completed a week's instruction in snow surveying last week at Park City, Utah.

Mr. Boner was one of about 75 trainees from various federal, state, and local agencies attending the West-wide Snow Survey Training Conference.

The course featured instruction and training in snow sampling and water content computation, soil moisture reading, skiing, cross country snow travel, outdoor survival in snow, first aid and information.

The survival instruction included construction of a shelter in the mountains above Park City and sleeping in the shelter overnight.

Snow surveys are made regularly in mountainous areas of the west for the purpose of water supply forecasting for irrigation, industry, flood prevention and recreation.

**4-H Leaders at OSU**

Attending the Oregon State 4-H Leaders Conference in Corvallis, Jan. 20-22 were Mrs. Don Linnell, Ione, Mrs. Chester Wilson, Mrs. Orville Buchanan, and Mr. Pete Richards, Irrigon. The group accompanied 4-H agent, Gail McCarty. Theme for the three day conference this year was "Oregon 4-H Leads Out".

While on campus the leaders had the opportunity to attend programs, workshops, and hear many inspirational speakers. Workshops were on Understanding Teenagers, Teenagers, 4-H Leader Responsibility as a Teacher, Making Projects fit the needs of club members and providing learning activities and experiences in addition to club work.

A highlight of the trip for Morrow County leaders was the presentation of a \$100 contribution by the South Morrow 4-H Leaders Council to the IFYE fund. Mrs. Linnell presented the donation for the Council.

One night of the leaders conference is traditionally designated as International Night. Program is provided by Oregon IFYE's. All contributions by counties to the IFYE program are presented on this evening. The \$100 contribution is a "first" for Morrow County.

Leaders became very aware of the total 4-H picture by attending the State Conference, returning home feeling inspired and dedicated.

**Hot Second Quarter Shows HHS Victory**

Watkins, Kemp and Van Marter blazed the way for another Mustang victory bringing their record to 8-4.

Two points separated the two teams at the end of the quarter with the Mustangs trailing. The Horsemen won the game in the second quarter by outscoring the Huskies.

The second half was nearly even on scoring with Heppner tallying 32 to Sherman's 31. This left the final score to stand Heppner 75, Sherman 61.

Coach Clough said he was happy with the teams improvement. He also stated "Stanfield and Sherman were much improved teams."

La Verne Van Marter scored over Bill Nesbitt repeatedly and Steve Kemp dumped in 13 points to fill a gap in on the scoring, not to mention 22 big rebounds. Gary Watkins was hitting from all over the court and ended up high point man with 31.

**Farmers Insurance Group Approves Agent**

Jack L. Wright has been appointed an agent for Farmers Insurance Group serving the Heppner, Lexington, Ione and surrounding area, it is announced by Ron Ricard, of The Dalles, district manager.

Mr. Wright will have his offices at 540 S. Main St., Heppner.

Companies making up Farmers Insurance Group are Farmers Insurance Exchange, Truck Insurance Exchange, Fire Insurance Exchange, Mid-Century Insurance Company, Farmers New World Life Insurance Company, and Farmers Texas County Mutual Insurance Company.

This coming Sunday night the NEW OUTLOOK Choir from the Christian Church in The Dalles will be at the Heppner Christian Church at 7:00 p.m. The director of this choir is Dick Struckmeier, who graduated from Heppner in 1965.

**Ione Garden Club Hear Varied Reports**

Ione Garden Club met at the home of Mrs. Kenneth Kilinger for their Jan. 13 meeting. A dessert was served consisting of salad and crackers, and punch and coffee at the beginning of the meeting. Mrs. Fred Martin, president presided and the afternoon schedule was a busy one, with several interesting reports from the members. A trip to Sleepy Hollow Gardens in Portland, owned and operated by John Leach was discussed. The date was set for the first week in May, with Mrs. Heliker and Mrs. Huber notifying members of the exact day.

Committee consisting of Mrs. Kenneth Palmer, Mrs. Gar Swanson and Mrs. Willard French was appointed to make table favors for the Regional Meeting to be held in Portland in 1971.

A most interesting and educational report on the Puncture Weed was given by Mrs. Swanson. She brought out the fact that people should be educated on this nuisance weed as to what it looks like, its danger to our county and the ways to control it. Plans are underway for posters with pictures and pieces of the weed to be placed throughout the county for this educational program.

The group heard a report on Federated Garden Clubs and the benefits derived from belonging, by Mrs. Harold Huber. She listed 21 reasons why it is beneficial to belong, such as 4-H scholarships given yearly, conservation and reseeding program in Central Ore-Horticulture Workshops, Legislation, Anti-litter, and Landscape design. An enlightening statistic was the fact that 1,000,000 acres of quiet wilderness in National Forests of 15 years ago are now over half gone. In 10 years we lost over 1,000 miles of wilderness trails and 40 years ago there were 270 Peaceful Valleys and now only 7 uncut valleys remain. Under the state Federation we have 63 State Committees, among them Birds-Books-Air and Water Pollution, Hillcrest School for Girls (Flow-

er arranging, etc.). Memorials National Cemetery (Willamette in Portland) State Fair, Horticulture, Chaplain and Remembrance, Civic Development and many others. Federation membership could be listed as follows: Individual member, Local Club (Ione Garden Club), District (Blue Mountain No. 20), State Garden clubs, Regional, and National.

Mrs. Loree Hubbard gave a most educational report on soils, the different kinds, and fertilizers. She stressed the kinds of soils for plants, trees and also told what different kinds of fertilizers will do these in association with plants, such as sweetening the soils by adding ingredients. Soil testing was also discussed and how to handle the different problems arising from depleted soils.

**Horsemen Retain Top Ten Rating**

By KEVIN DICK

"It is not a matter of stopping one man but it's a matter of stopping all five men that are on the court for the Pilot Rock Rockets," says Varsity Coach Bob Clough.

This weekend the Mustangs will play the Maupin Reddies Friday night at Maupin, and Saturday night will meet the Pilot Rock Rockets on our home floor.

Maupin is not a real big team. They are probably about the size of Umatilla or Stanfield, but Condon just squeaked by them. "They're a good ball club," says Clough.

The Rockets are a real well balanced team. Coach Clough kind of agreed with the Condon coach when he said "Pilot Rock is the best team in the league," but Clough stated "The Mustangs shouldn't be counted out." The Condon coach also said, "La Verne Van Marter is the best ball player in the league." So the Pilot Rock game should be a real rip-snorter.

**Situation: Ground frozen tight all winter. No wheat or weed growth since the Nov. 21 snow. Wheat price outlook best in 4 years.**

**How to turn this winter into a weed control advantage when the weather opens up.**

Just as soon as the weather breaks. That's the time to spray your wheat herbicide this year to beat the weeds, get your best yield, and cash in on the market.

This is because winter conditions have set the stage for your most profitable use of Igran® 80W herbicide this spring in an early spray.

Wheat is still small. Weeds are short, but cover fields like a dense carpet that can get a strangle-hold on your wheat in no time. And you have the moist soil and growing conditions this spring for weeds to do just that if you wait until wheat is tillering before you go after 'em.

With Igran, you can spray when the weather first breaks. By ground rig or fly it on. To get your problem weeds out before they get ahead of your wheat and stunt your yield.

Spray Igran any time. Before weeds are four inches high or three

inches in diameter. You can do this with Igran because it's safe to wheat. That's why it's the fall herbicide you can spray in the spring.

With liquid nitrogen to weed 'n feed in one pass, which is an excellent idea this spring because we have the favorable soil moisture for it. And the good wheat prices.

Why not use 2,4-D or MCPA? Because this is the year you want your best yield. And you can't get it if you wait until wheat tillers, until everything is "just so" for 2,4-D or MCPA. Besides, they don't get many of the problem weeds Igran gets. Like speedwell, chickweed, henbit, gromwell, tarweed, purple mustard, dog fennel, fanweed, bedstraw and others.

In fact, Igran gives you control of most annual broadleaf weeds and grasses. Even gives partial control of cheatgrass, enough so you're able to make a crop.

And this is the year when every bushel counts, when every weed hurts.

So don't lose 6-8 bushels per acre by using phenoxy-type weed killers like 2,4-D and MCPA. That's what their injury to wheat costs you. Not to mention the yield lost because you had to wait to spray and then problem weeds escaped anyway.

Rotation? You can follow an Igran wheat crop in rotation with peas, lentils, fall barley, alfalfa, bluegrass or clover. No problem.

To sum up, this is the spring for Igran herbicide.

So, check fields for problem weeds early. Then knock 'em out with Igran just as soon as the weather opens up.

Geigy Agricultural Chemicals, Division of CIBA-GEIGY Corporation, Ardsley, New York 10502.
