## 'Oregon 4-H Lead Out', is Theme Of Leaders Meet

By FRANCES ROSE WILSON (Delayed)

IRRIGON — The 36th Annual Oregon 4-H Leaders Conference closed Friday, Jan. 22, at OSU in Corvallis, after a 3-day session. Gail McCarty, 4-H Extension Agent of Heppner, Mrs. Orville Buchanan, Mrs. Chester Wilson and Pete Richards of Irrigon and one leader from Ione attended the conference from Morrow County, as well as a group from Umatilla County.

The International Buffet on Wednesday evening, in the Memorial Union Ballroom, was attended by 246 youth leaders, IFYE and foreign students. Many foreign students wore their native dress, which made the occasion very colorful. Lois Redman was the program chairman and Mrs. Evelyn Brookhyser presided. Returned International Foreign Youth Exchange students showed colored slides of the lands they had visited, and compared notes. They were Jerry Obendorf, Sweden; Sharon Drake, Norway; Esther Bell, Nicaragua; Sue Wheelhouse Werth, Costa Rica. Mrs. Louise Piper of Milton-Freewater told of her experience as a host parent to an IFYE student.

At the general session Thursday and Friday mornings, group singing was led by Marvin Young, Extension agent from Douglas County. The theme of "Oregon 4-H lead out", was emphasized throughout the conference. "Lead Out" in good nutrition, in education, in conservation, in promoting community pride.

Dr. Don W. Stotler, Evaluation Specialist of Portland Public Schools, spoke to the group, who came from all counties, on Thursday evening.

A distinguished service award was presented to Mr. and Mrs. Ivan Stewart, who have sold their 720 acre tract of land, to the Oregon 4-H Council. Their goal was to have this area used to help advance young people. It will be developed into a 4-H youth center and experiment station. Colored slides were shown of the picturesque area that has plantings of trees from all states of the nation.

Acknowledgement was given to the Union Pacific, Standard Oil Co. and Sears Roebuck Foundation for their support of 4-H.

While much is gained from attending the State Conference, Extension agents of Eastern Oregon feel that regional conferences with more leaders attending would better meet the need of this area East of the Cascades. Tentative plans were made to have the first meeting in Heppner on Feb. 27, with another meeting at Baker, later in the spring.

Mrs. Linea Nottage left last Friday for a month's Caribbean Cruise. Prior to her departure she spent a few days in Ione with her brother, Carl Troedson. When she came up from Portland she was accompanied by Agnes Sperry. Mrs. Sperry had been called to Portland by the serious illness of her brother-in-law, Frank Gentry.

**Situation: Ground frozen tight all winter. No wheat or weed growth since the Nov. 21 snow. Wheat price outlook best in 4 years.**

# How to turn this winter into a weed control advantage when the weather opens up.

Just as soon as the weather breaks. That's the time to spray your wheat herbicide this year to beat the weeds, get your best yield, and cash in on the market.

This is because winter conditions have set the stage for your most profitable use of Igran® 80W herbicide this spring in an early spray.

Wheat is still small. Weeds are short, but cover fields like a dense carpet that can get a strangle-hold on your wheat in no time. And you have the moist soil and growing conditions this spring for weeds to do just that if you wait until wheat is tillering before you go after 'em.

With Igran, you can spray when the weather first breaks. By ground rig or fly it on. To get your problem weeds out before they get ahead of your wheat and stunt your yield.

Spray Igran any time. Before weeds are four inches high or three

inches in diameter. You can do this with Igran because it's safe to wheat. That's why it's the fall herbicide you can spray in the spring.

With liquid nitrogen to weed 'n feed in one pass, which is an excellent idea this spring because we have the favorable soil moisture for it. And the good wheat prices.

Why not use 2,4-D or MCPA?

Because this is the year you want your best yield. And you can't get it if you wait until wheat tillers, until everything is "just so" for 2,4-D or MCPA. Besides, they don't get many of the problem weeds Igran gets. Like speedwell, chickweed, henbit, gromwell, tarweed, purple mustard, dog fennel, fanweed, bedstraw and others.

In fact, Igran gives you control of most annual broadleaf weeds and grasses. Even gives partial control of cheatgrass, enough so you're able to make a crop.

And this is the year when every bushel counts, when every weed hurts.

So don't lose 6-8 bushels per acre by using phenoxy-type weed killers like 2,4-D and MCPA. That's what their injury to wheat costs you. Not to mention the yield lost because you had to wait to spray and then problem weeds escaped anyway.

Rotation? You can follow an Igran wheat crop in rotation with peas, lentils, fall barley, alfalfa, bluegrass or clover. No problem.

To sum up, this is the spring for Igran herbicide.

So, check fields for problem weeds early. Then knock 'em out with Igran just as soon as the weather opens up.
