### Psychiatrist Speaks At Drug Series

Dr. Warren Hall, staff psychiatrist from Eastern Oregon State Hospital in Pendleton was the guest speaker at the last Community Drug Education Meeting. Dr. Hall works almost entirely with drug addicts and alcoholics. A very recent case was an eight year old girl who had been sniffing glue. She had been an "A" student in school and had dropped to "D's" and "F's" when her parents suspected something was wrong. It appears now that she has sustained serious brain damage to the extent that she has to be institutionalized.

It is to prevent tragic stories such as this and thousands more that happen each year that this series on drug abuse is being held. Parents as well as young people need to realize more fully the real problem and threat to one's mental health and life that drug abuse can cause. Too many parents are not concerned until one of their children or a friend's becomes dangerously involved or hooked on drugs. But then it is usually too late. The only effective cure is prevention. Once mental disturbances or brain damage occurs, irreparable damage has been done, and in most cases, victims can never fully recover.

In visiting a government center for the rehabilitation of drug addicts recently, Dr. Hall inquired about their percentage of successful recoveries. Only 6% make a recovery (don't have to return to the institution again), and many of this 6% leave the country or change their name, so it is not really known how many make a successful comeback.

#### Alcoholism—Major Health Problem

Dr. Hall stated that alcoholism has become a major health problem in Oregon. He stated that one out of every ten deaths in Oregon is due to cirrhosis of the liver, which is caused almost entirely by drinking. He said that alcohol is an addiction that is always 100% fatal unless the person stops drinking.

"Tension and loneliness are two main reasons why most people drink heavily," he said. "People who drink for these reasons are really practicing 'do it yourself psychiatry' and this is absolutely deadly."

Another serious problem developing in our country is the wide use of the minor tranquilizers. "We get people at the hospital all the time who are psychologically addicted to the use of sleeping pills, barbiturates, and tranquilizers. We put them in the same group therapy classes as the alcoholic," Hall said. "It is the same basic problem of turning to drugs to meet everyday stresses and problems of life, rather than finding acceptable solutions."

#### Learn to Handle Loneliness

Dr. Hall stressed very strongly the need for prevention of drug dependence. One very important aspect of prevention is to help people find good, acceptable ways to handle loneliness and tension. This needs to be learned at a very young age. This training should be an important part of the education that parents and teachers need to give more consideration to.

Hall pointed out another important area in prevention—that of instilling ideals and worthwhile goals and objectives in the minds of our young people. "This will do more than anything else to give 'proof' against drug addiction. Good sound Christian principles and character development will go a long way in making youth and everyone responsible, mature citizens. This is one area that the church can be of help in preventing drug abuse.

Dr. Hall brought out the fact that the best help for people with drinking problems can be given by members of their own family and by other people with similar problems. Alcoholics Anonymous was founded upon this principle and has been a big help to thousands to overcome alcohol dependency.

Thought and plans are being made toward starting an AA chapter here in Heppner. The Methodist Church has consented for the AA group to meet in their facilities.

PENDLETON

1290 KC

Well Proms come and go and this year is one that will be remembered. Riverside's band got into Pendleton and asked where Riverside was. There is an area outside of Pendleton known as Riverside and there's a Riverside down by Ontario. Don't know where the band ended up but it was a week later that they returned to play for the Riverside High School Jr.-Senior prom, Free!!

The Coal Train brought some of the best music that the Heppner High School has ever had for their Junior-Senior prom. Understand some adverse remarks cut the dancing short when the band packed up and left. Too bad!!

I cringe whenever anyone suggests cutting down trees in Heppner. Heppner needs MORE trees. The charm that Walla Walla has with its tree shaded streets as the trees meet overhead. The oasis that is Hooper, Wash., where the green of the grass and trees meet the desert.

Down town Portland and Salem seem to be doing away with their down-town tubs. Down town where Salem has removed their tubs, they have cut out a 3' square of sidewalk and planted a tree.

I get real excited about Heppner's Centennial next year. I'm for adopting a Centennial tree and everybody plant one in his parking strip or yard. Some consideration should be given to just what kind of tree we need to adopt for our "Centennial Tree". A fast growing tree, a clean tree, a tree without shallow roots. I'd like one that blooms, that has fruit that the birds like.
