PRE-GRADUATION BLUES were vanishes with a down beat at the Dave Kirchers Sunday afternoon. The U. S. Barrel boys "let down their hair" and took off their shirts and had a bang up time. ### Referendum for Sheep Producers

A mail referendum for sheep producers will be conducted by the Agricultural Stabilization and Conservation Service (ASCS) Office between June 7 and June 18, 1971, according to David McLeod.

Ballots will be mailed to all producers, of record, having ranch or farm headquarters located in the county. The mailing of a ballot is not a determination of eligibility to vote and if a producer does not receive a ballot, he can obtain one in the ASCS County Office upon request.

An eligible voter is a producer who, continuously during a single period of at least 30 days during the calendar year 1970, owned in the United States any sheep or lambs 6 months of age or older.

The referendum is being held

to determine producer approval of an agreement between the Secretary of Agriculture and the American Sheep Producers Council, Inc. for the advertising and sales promotion of lamb and wool as contained in section 708 of the National Wool Act of 1954, as amended.

### Golf Course Again Open After Flood

The Willow Creek Country Club golf course again received damage from the flood; however, not as much as in the 1969 episode.

Due to the cleaning and clearing of Willow Creek by the members, the water was able to flow much faster and less escaped the banks.

Three of the four greens which were covered with mud and silt have been cleared. Play has been resumed with the exception of No. 3 hole which received the brunt of the damage and remains to be cleared. Re-seeding will be necessary to all areas affected.

Grounds committee chairman, Clint McQuarrie expressed the club's desire for members to again make use of the golf course as it is again in playing condition.

The future is rapidly becoming the present . . . and what are we going to do in the year 2000 when it's predicted, our nation's population may have increased to nearly four hundred million.

How are we going to feed all these people? It adds up to a big problem.

Granted this may very well become a big problem but Morrow County has a start toward helping on it.

Your local Columbia Basin Electric Cooperative Inc. is happy to be a part of the large irrigation projects in Morrow County, and will enjoy the increased usage Kinzua's new peeler mill will create.

These projects will be of great help in providing food stuffs and shelter for the anticipated increase in population.

If you are planning any large increase in electrical usage please call your local Electric Co-op so we may include it in our planning.
