Salary Consultations Begin October 19

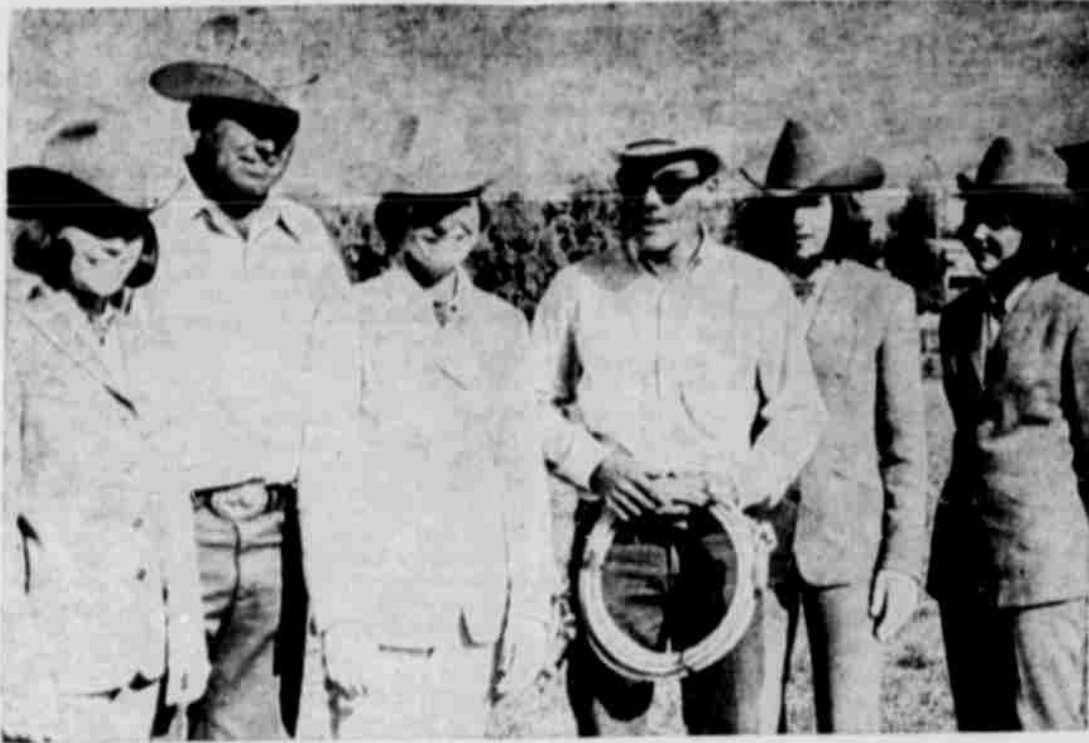

The Morrow County School Board met with representatives of the teachers and classified employees at a special meeting in Lexington on Oct. 5. The purpose of the meeting was to establish a meeting calendar and consultation guidelines for future meetings.

The consultation meetings with teacher representatives will be about the same as in past years. The consultation meetings with representatives of the classified employees, (cooks, custodians, secretaries and bus drivers) will be held for the first time this year. These meetings are required by law as a result of legislation passed by the 1971 legislature.

The areas open for consultation by both groups are salaries and salary related items as well as grievance procedures. OEA-OSEA Chapters Represent in elections held earlier this year, it was determined that the

Morrow County Chapter of the Oregon Education Association would represent the teachers and the Morrow County Chapter of the Oregon School Employees Association would represent the classified employees. The principals in the school district decided not to enter into formal salary consultations and their salary schedule will be determined by the school board without holding consultation meetings.

The meeting schedule calls for the first meeting to be held on Oct. 19, 1971, at which time both groups will present their proposals to sub-committees of the school board for their consideration. Discussions on the proposal will continue at three future meetings with a settlement being reached by Nov. 23, 1971. If an agreement has not been reached by Nov. 23, the matter will be referred to mediation as required by law.

Union Pacific people have what it takes...

TEAMWORK!

Teamwork is really what it's all about.

People plus equipment equals performance. And at Union Pacific it adds up to a dependable performance in the win column.

Modern railroading is a complex operation involving everything from radar controls to the world's largest, privately owned communications system. For instance if you want to know where your car of freight is—within minutes we will trace and report.

But for all the sophistication of modern equipment, Union Pacific's chief asset is people — experienced, capable railroaders who deliver the goods to you and for you.
