

### Cal's Cafe Opens Under New

Two bills and their wives have worked for two weeks to ready Cal's Cafe for opening. Mr. and Mrs. Bill Lynch and Mr. and Mrs. Bill Scott are together on this new venture. They are all natives of Heppner.

One wall of the cafe has been painted a warm shade of persimmon that goes well with the browns of the knotty pine on the other wall.

They plan to use other earth colors of yellows and greens to provide a homey atmosphere.

They plan to rise before the sun and be open for breakfast until midnight snacks. They will feature broasted chicken and homemade cakes and pies.

### Boys' Ranch Head at 1st Series Meet

The first in the Family Life Series will open with a one act play "Our Kind" by the Heppner Drama Club on April 5. The play presents problems that cannot be settled once and for all. The audience is encouraged to examine its own motives and clarify ideas. Do you agree with many sociologists and family-life experts who believe that similarity of background and upbringing is one of the most important prerequisites for achieving success in marriage?

The same problems encountered in the play are everyday problems at the Umatilla County Boys Ranch whose directors will be the discussion leaders for the evening.

Ted Condon, the Ranch's executive director has his degree as Master of Social Work. He has been director of Boys Ranch since Oct. 1, 1969. He will be assisted by two counselors from the Ranch, Bob Hart and Jerry Calavan who have been at the Ranch since Jan. 1970 and Oct. 1970 respectively.

The sessions will start at 7:30 and close at 9:30. Parents, young people and grandparents are urged to sit in on the sessions which will present a new awareness of today's problems.

### Ways To Use Electricity Efficiently

**Adequate Wiring**  
An adequate wiring system is the first step toward efficient, economical, and safe use of electricity. If your wiring system is not big enough to carry your home's electrical load, operation of your appliances and other electrical equipment slows down. This wastes electricity and could damage your appliances and equipment. Whether you're remodeling, building, or buying a home, adequate wiring assures you of greater efficiency in your uses of electricity.

Designing an adequate wiring system is no job for an amateur. Deal with a reputable electrical contractor when checking or installing wiring.

**Electric Heating and Air Conditioning**

The proper installation and operation of equipment can measurably increase the efficiency of electric heating and air conditioning systems.

- The following tips apply to both heating and air conditioning:
- Adequate Insulation
  - Properly designed duct system
  - Caulking around doors and windows
  - Weatherstrip outside doors
  - Make sure thermostat is accurate
  - Clean filters frequently
  - Install vapor barrier
  - Choose right size heating and cooling system
