The informal pictures taken at Kathleen Sweeney's wedding are exceptionally good. The photographer got some good shots of Kathleen with Tiny, with her dad, going up the aisle, eating cake etc. That's when the pictures stop! The bridesmaids kidnapped the bride for an hour or so and the photographer couldn't wait!

There were enough brothers on both sides to fill all the "Male positions" in the wedding party!

Hazel Mahoney is one frustrated grandmother. She had planned all along to go down to Shannons when the baby arrived. The baby is here but Hazel is still nursing an injured foot from her Palm Spring trip and can't go down.

When I picked up the Justice Court last week. Judge Charlie O'Connor said if I'd look in the March 1972 Gazette-Times I'd find items about three Claudes. I looked but I only found 2 Claudes

Of Claude Charles O'Connor... After assuring the readers that mother and son were fine they wrote "Charles is smoking those long cigars and wearing that broad grin that doesn't come off."

The other Claude was born to Mr. and Mrs. Watt D. Brashears who now lives at Lyle, Wn. The final sentence read "Watt has been unable to come to town since the happy event but we are anxiously awaiting his coming as we wait to smoke on him!"

Charlie O'Connor said the other was Claude Morgan but he doesn't know where he is anymore.

It is so fascinating looking through the old editions that you stop and read and forget what you're trying to look up. Many, many familiar names of families that are still in the country.

Prior to her marriage early in March, Kathleen Sweeney was honored with several bridal showers. Friends who hosted a shower at St. Patrick's Parish Hall were Nona Sowell, Mrs. Dick Meador Mrs. Riley Munders, Mrs. Creston Robinson, Mrs. Ernest McCabe, Mrs. David McLeod, and Mrs. Arnie Hedman.

JUST ABOUT ALL YOU EVER SEE OF US

When one of our people says he works for Pacific Gas Transmission Company, a common reaction is "Pacific who...?"

Yes, we are a "low profile" operation. A few compressor stations, and these signs in strategic places, are about all you ever see of us.

We are a \$170 million pipeline running through Idaho, Washington and Oregon. A pipe that's a yard in diameter and delivers each day as much energy to California and the Northwest as seven Grand Coulee Dams could produce. The product we deliver is natural gas from Alberta.

So, while we don't exactly stand out in the crowd, we like to think we are good citizens. Most of our system is hidden in the ground. But, on our way to California we pay \$1.7 million a year in taxes to Pacific Northwest counties. More than half of that goes to support local schools. In fact, in some counties we are the largest single taxpayer.

The next time you meet one of our people we would like you to remember this ad. It's an introduction to a good neighbor and a solid citizen of the Northwest.
