Heppner Flood Alerts

A flood alert is given to us through the Weather Bureau and State Warning Bureau which tracks the clouds with radar. If they feel there is danger they notify the County.

An alert DOES NOT mean that we will have water. The wind could change the path of the clouds or speed or slow the clouds in our area.

Upon receiving the alert warning which the State Warning Bureau calls us, the alert will be sounded. The Creek Watch will go into action.

There will be NO all clear. If, after a length of time, the clouds tend to clear, we can go back to normal duties. You will be notified by the City Police or Firemen.

The alert is a sounding of the sirens consisting of three 10-second wails. DO NOT confuse this with the fire horn which is an air horn, not a siren. Evacuation is a continuous blowing of the siren.

Remember, if we get an alert, do only what you have to do and please do not drive around to see what is going on as it just adds to the confusion. And it can only cause more problems.

Any help will be appreciated. Contact any fireman, policeman or Sheriff's Office.

All parts have arrived and the new sirens are being installed in Heppner this week.

Sheepskin Dollars

The Heppner Merchants have issued souvenir money-replicas of Sheepskin Scrip for the Heppner Centennial. These "dollars" are available at both local banks. Merchants honor the money just like legal tender and will continue to do so until the last of Sept. You can use this just like regular money in Heppner stores. The money was manufactured by the Heppner Gazette-Times. First printing was completed last weekend.

Old Timers? New Expected At Picnic

National Forest Forum Set

Are you interested in the management of your National Forests? Do you wish to become involved?

If so the Umatilla National Forest want to solicit your ideas and opinions in a public forum to be held May 25 in the Main Theater Room at BMCC, Pendleton. The public forum will begin at 7:30 p.m.

One of the Forest Service objectives is to involve the public in Forest policy and program formulation. Recently, public meetings have been held to discuss management alternatives on specific areas. However, these meetings did not present the opportunity for discussion on land management activities. H. B. Rudolph, Forest Supervisor, said that the purpose of the public forum is to give everyone an opportunity to voice their opinions and ideas concerning the land management activities on the Umatilla National Forest.

The public forum will not have a formal agenda. To get the meeting underway, Supervisor Rudolph may begin discussion on some topics that are of local concern.

This public forum is the first attempt by the Umatilla National Forest to involve the public, at-large, in Forest policy and program formulation. It is hoped that such meetings can become a regular occurrence. The public interest will determine whether any other meetings will be scheduled.
