Cross section of America

Gun-owning private citizens have been painted by anifgun zealots as a threat to the peace and tranquility of the community. Who are these people who persist in exercising their traditional right of possessing firearms?

On the occasion of its 101st Annual Convention, the National Rifle Association, which represents nearly one million gun-owning citizens, issued a statement through its 12.8 president General Maxwell E. Rich that helps to supply the answer. He said, "Our membership is a true cross section professional people, athletes, students, men, women, and children are among our numbers-all outstanding representatives of honest, law-abiding American citizens; our members are a credit to any community. This year, 1972, is particularly important to our membership because we have an opportunity to provide a service to our nation. The NRA Shooting Team which will join with the rest of our country's finest athletes to compete in the XXth Olympic Summer Games at Munich in August and September."

The members of the National Rifle Association are, in truth, a "... cross section of America " These are the people, and this is the organization that antigun fanatics and antigun laws seek to punish. Rarely has there been a more flagrant attempt to abridge one of the most elemental principles of personal liberty than in proposals to prohibit firearm ownership by law-abiding U.S. citizens.

Beware !--The bug is back

For those of us fortunate enough to have escaped the childhood killer and crippler of generations past, it may come as quite a shock that state health authorities warn we are ripe again for a polio epidemic in Oregon.

With availability of the Sabin oral vaccine and the earlier Salk vaccine, pollo has disappeared completely from the state since 1965, according to state public health officer. Dr. Edward Press But we have grown complacent, a very human problem for

which no vaccine exists. This complacency now means that half of all the young children in the state as unprotected against the polio virus. When the easily taken Sabin "sugar cubes" first appeared.

there was a community wide (really nationwide) program of Immunization with ticket books sold entitling buyers to the full series of innoculations at a given time in a central place

It would be a considerable blessing for the youngsters of our community if a group could organize another community wide drive to innoculate those susceptible to the crippling virus before a summeritime epidemic brings tragedy back to many Canby Herald families

Pass Another Law

mericans have a ready solution for every problem which confronts us, pass another law, We heap law upon law, and each new statute seems to defy it or find a way of evading it, we spend more money to pass laws, and more money to break the laws we pass, than any nation in the world. And we think that the only way to correct all this is to pass another law. The something that makes laws work in als missing We have beenme an involved in legality that morality is forgotten. And the result is more and more laws in a vain effort to keep us from being inhuman to each other. This is not progress.
