2800 Mile Trip

Pat Brindle and Iris Howell, director for the Activity Center for the Handicapped in Pendleton, have returned from an exciting 2800 mile trip.

The Seattle Trade Fair, August 19, was their departure point by ferry to points in Canada. From Tsawwassen by ferry to Swartz Bay they drove to Victoria, B.C. and enjoyed all the sights of this charming "bit of England" town.

Leaving the Island at Nanaimo they arrived at Horseshoe Bay on the mainland and drove to Vancouver where they stayed with a cousin. Gastown, an area in Vancouver where the buildings have been rejuvenated was an offbeat experience for Pat and Iris. The area is featured in the Sept. issue of Sunset Magazine.

Pat also suggests a tremendous place to eat in Vancouver—the Jasmine Inn, a Chinese restaurant on the waterfront.

The Frazier River Canyon was next from Kamloops to Revelstoke, across to Golden and then to the Columbia Ice fields south of Jasper, Alberta, Canada. Lake Louise was next and on Sulphur Mountain they rode the Gondola and enjoyed the breathtaking sights. After a visit at Radium Hot Springs they started their return by way of Fort Steele, B.C. This gold mining town has been restored.

They left B.C. for the Flathead area of Montana and stopped at the Four Winds trade area to obtain Indian Crafts.

From Missoula they traveled through 134 miles of mountains and campgrounds on the LoLo Hot Springs Pass. They reported seeing only one bear. From Lewiston, Idaho they entered Washington and into Pendleton and home to Heppner, on August 28.

DOTS JOTS

Rick Wadholm has his pictures back that he took while he was in Europe. He showed them recently for friends at the Assembly of God Church. His pictures are not so much of scenes but of people. His experiences were varied from singing in churches to a fast trip by ambulance to the hospital to have his stomach pumped out because of food poisoning.

I did a little favor for him before he took off on his trip. He did without his last meal before boarding the plane to come home and used that money to buy me a miniature full-rigged Viking sailing ship. He completely surprised me with this gift when he showed the pictures at the church.

Any group wishing to see his pictures and hear him tell about his trip, could contact him by calling the Don Burwells.

The key to success is the ability to get along with some people—and ahead of others.

Molly Tells Drying Process For Food Preservation

Home drying of fruits and vegetables has become an increasingly popular method of preserving fruits and vegetables in Oregon, notes Molly Saul, Extension Home Economist for Umatilla and Morrow Counties.

Almost any fruit or vegetable can be dried, but some dried foods are more appetizing than others. Of the fruits, apples, peaches, apricots, berries and cherries are among the best. Dried sweet corn is a particularly satisfactory vegetable.

To assure success in your drying efforts, Mrs. Saul offers these guidelines:

Select good quality foods. When fruits and vegetables are right for eating, they are right for drying. Prepare for drying with thorough washing, peeling, coring or pitting, and cutting in slices, rings or halves as appropriate.

Many fruits, especially apples, apricots, peaches, nectarines and pears, tend to darken during drying and storage. To prevent browning, fruits may be soaked in a sodium bisulfite solution (2½ teaspoons per quart of water) for fifteen minutes. Sodium bisulfite may be purchased at most local drug stores. Then dry fruits. For peaches and apricot halves, dry with pit side up.
