The Truths of Nutrition is Study Lesson for Home Extension

"What's New in Nutrition" will be the April study lesson for all Home Extension groups in Umatilla and Morrow Counties, reports Extension Home Economist Molly Saul. The lesson will provide information to help homemakers make decisions concerning which foods to buy to protect the family's health and pocketbook.

Mrs. Saul states that so much is currently being written about nutrition it is becoming increasingly difficult for the average person to know what to believe and what to discredit.

Information in the lesson will assist families in making decisions regarding such purchases.

Those interested in participating in a local discussion group are asked to telephone the nearest Extension office for dates and locations of meetings. Extension membership is not required.

Leaders who will teach the lesson in Morrow County are: Mrs. W. H. McCoy, Mrs. F. S. Highley, Boardman; Mrs. Van Hubbard, Ione; Mrs. Weldon Witherrite, Echo; Mrs. Birdine Tullis, Heppner.

Scott McMurrdo Gives Stock Market Advice

The ups and downs of the stock market were explained by Scott McMurrdo at the Heppner-Morrow County Chamber of Commerce meeting Monday. Scott McMurrdo, son of the late Dr. and Mrs. A. D. McMurrdo, is divisional manager for International Securities Corp. with headquarters in Corvallis.

He said that anyone wishing to invest in the stock market

should be prepared to study the stockmarket three to five hours a day. Otherwise go to an expert.

He noted the two historical facts that seem to have a bearing on the stock market. The third year of every decade has been a down time on the stockmarket: 1933, 1943, 1953, 1963, and following this trend then 1973 would be a down time. He also said that the market has gone down on every 3rd year of a second term president.

What to do on a down market? One way is to watch and wait for it to go back up. He said that it goes down faster than it goes up.

He showed by graph the high peak in 1965 followed by 7 months that the market went down and the 15 months back up to a high peak in 1968. When it started down the next time it was 18 months to the low point before it started back up again and took 32 months to the high peak in January 1973.

Investors pay a commission when they sell and-or buy. On a high or falling market, Scott urged investors to enter a guaranteed government position. This is with US Bonds and treasury notes. They don't decline. "The government has never reneged."

"The stock market should go up because the economy is robust and the Vietnam war is over but the negative factors predominate," he said. There's the rising interest rate, international monetary unrest and the historical factors, all against rising market.

He explained there couldn't be a repeat of the 1929 market crash because there are so many built in protections that are entirely different than in 1929.

He urged those interested to

be prepared to spend three to five hours daily studying the market or "put your money in the hands of an expert."

Governor's Tax Plan

Ron Daniels asked everyone to vote at the School budget election being held Monday. He also said that after this week he would be glad to speak anywhere for any group to explain his analysis of the Governor's Tax Plan and how it will affect Morrow County.

Joyce Bergstrom won the pot again.
