Correction

BPA rate up 25%, not CB's rate

The Heppner Gazette-Times incorrectly reported last week that there would be a power rate increase of 20-30 per cent beginning on Jan. 1 with 25 per cent selected as the average. Such is not the case, according to Dave Harrison, manager.

Columbia Basin Electric received an "impact study" of BPA proposed rate increases two weeks ago. There were also news releases by BPA which indicated BPA was considering a rate increase 20 to 30 per cent effective Dec. 20, 1974. For purposes of their study, they used an increase of 25 per cent. The BPA study generalized by saying that a 25 per cent increase in wholesale power costs would result in a 10 percent increase in total expense for the utilities, such as Columbia Basin. This is because the cost of power is generally 35-40 per cent of total utility costs and that portion would be attributed

directly to increased costs. In other words, 25 per cent increase of 40 per cent of costs results in 10 per cent increase required by the utility, Harrison explained. Over the last several months Columbia Basin has had information in the newspapers and in the "Annual Report" telling about plans to consolidate rates. There will be an increase in revenues of the Co-op of about 5 per cent as a result of the consolidation. There will not be an increase of 25 per cent as of Jan. 1, 1974. There has been no change in the plan approved by the REA, BPA, and the board of directors of Columbia Basin. The change in the irrigation rate will be effective with the first billings in 1974. The changes on all other rates will be effective as of May, 1974. The Gazette-Times regrets the error.
