

Steve Anderson reports

# City water plan near final phase

STEVE ANDERSON

Steve Anderson, city engineer, gave a progress report on the city water improvement project at the Chamber of Commerce meeting Monday.

Anderson recalled that the water project began in June, 1973. At that time the project was held up awaiting the Corps of Engineers decision on the proposed Willow Creek Dam, because with the Corps participation in the project the city would have been able to replace three miles of existing 8-inch transmission main with 12-inch mains. On the basis of the Corps' participation in the project the City of Heppner passed a \$450,000 water bond issue. After the bill passed the Senate and the House sub-committees, the bill for Willow Creek Project was vetoed by the president.

Anderson's plans then had to be revised. "When the project is completed we will have 80 per cent of the proposed line installed as we promised the people, when we asked for their support of the bond issue," said Anderson. "The remaining 20 per cent is the transmission line and we will have to live with it until a grant comes through."

two grants, the most recent to the Department of Housing and Urban Development, in an attempt to complete the project, with installation of the transmission line.

The project started with Phase 1, which gave the city three wells that would function together, with the necessary improvements to Well 3. Phase 2 of the project is the tying-in and installation of new water mains throughout the city's system, along with the related work to the county reservoir.

Phase 3 deals primarily with construction of a new 250,000-gallon reservoir behind Heppner High School, which, when completed, will remove present restrictions to Lot's Addition.

"Other reservoirs we once considered abandoning will be put into use, with the reservoir behind the cemetery getting painted for the first time since it was constructed, and Reservoir 2 will be repaired to prevent it from leaking," he said.

The proposed plans were to build a new one million-gallon reservoir giving Heppner High School 3,000 gallons of water for a four-hour period.

However, with the system tied in as presently designed, the High School will be able to drain all water from the reservoirs for their fire protection needs.

"When the water system is completed, it will be one of the best systems in Eastern Oregon," said Anderson.

Phase 2 should be completed by June 1. However, the contractor for Phase 2 has plans to resurface and pave all existing roadways that were paved prior to his construction at the same time. He has to restore the roads to their present condition prior to any excavations. Ten per cent of funds will be withheld until all required work is completed.

Speaking of the contract for Phase 3, Anderson said the city has had a lot of response from contractors by letting the jobs during the winter months rather than during summer months. Asked from the audience what he considered to be the limit of growth of the city if

the transmission line is not installed, Anderson explained the town could support 2,500 and possibly 2,900 people at this time. But with the limited flow coming into town during the summer, and should a major breakdown occur, water would have to be restricted to the present users. The present system could supply 2,100 people, and if a well goes out there would not be any restrictions on water usage. When completed the system could handle all of the predicted growth for the next 10 years, he said.

Anderson also reported on the solid waste disposal site for the Heppner, Lexington and the lone area. "I hope to

have all of the easements and to have completed the survey work in the next three to four months, referring to the Black Horse Canyon site, and when this is completed to apply for a permit to develop the site."

"Once the permit is granted, a site development plan will be offered, and with its approval we plan to start using the site as soon as possible."

"I also plan to instruct the personnel in the use of the equipment for the disposal site," said Anderson, "for it is no longer a matter of just dumping garbage into a hole and covering it up. Excavations and earth fill must be planned in advance as the

proposed new development will only be about 10 per cent of the original site."

Anderson was asked why he proposed getting another inspector for the reservoir and Phase 3 of the water project. He replied that an inspector for the reservoir must be familiar with mechanical plans, must have a knowledge of pump stations and automatic valves and electronic controls. "It is easy to inspect an ordinary pipeline, but Phase 3 will be a complicated job, requiring a trained inspector."

State Representative Jack Sumner will be the guest speaker at the Chamber of Commerce Monday.

## Leo H. Holboke funeral held

Leo H. Holboke, 76, lone, died at Pioneer Memorial Hospital, Friday, March 7.

Mr. Holboke was born in Beaverton, Ore., Jan. 13, 1899. He moved to Heppner after World War I, where he ranched on the Stalter place for several years. He then went to Boardman and lived there until 1931. He came to lone and ran sheep until 1944, when he moved back to the Willamette Valley, where he engaged in several business ventures. In 1967, after making his home with a sister in Beaverton for six years, he returned to lone. For the past two years he lived at Jordan. Recital of the Rosary was Sunday, March 9, 8 p.m., at St. William's Church, lone, with Fr. John O'Brien officiating. Funeral mass was Tuesday, March 11, 10 a.m., at St. Cecilia's Church in Beaverton, with Fr. Anthony Gerace officiating. Casket bearers were George Moshofsky, Donald McElligott, Edward Holboke, Richard McElligott, Leo Moshofsky and James Holboke. Concluding services and vault interment were at Mt. Calvary Cemetery in Portland. Sweeney Mortuary was in charge of arrangements.

He is survived by two brothers, H. L. Holboke, Salem, and Bernard Holboke, Birkenfield, Ore.; and numerous nieces and nephews, including Don, Dick and Jerry McElligott, lone.

## We're a great big rollin' railroad movin' fast and runnin' strong.

We have to be. Because each and every day we deliver very necessary goods to you, the people of the Pacific Northwest. Things like autos, appliances, furniture and foods. Things that can't wait. And then we see that your paper, lumber, aluminum and fruit and frozen foods get delivered to people in other parts of the country.

We're the Union Pacific, and if you've been looking at us simply as a railroad train that hauls grain, we suggest you look again. And look deeper. You'll see a vital form of transportation at work for you—delivering all types of goods for all types of needs. It's a big order to fill.

## We can handle it.

the Union Pacific railroad people

## Public Notice

### Blue Mountain Community College

NOTICE OF BUDGET HEARING

The budget for Blue Mountain Community College for the fiscal year 1975-1976 beginning July 1, 1975, as detailed and summarized below, was prepared by the Accrual accounting basis, and is consistent with the accounting basis used during the last two years. Major changes, if any, and their effects on this budget are set forth in an accompanying statement. A copy of the budget document may be inspected or obtained between the hours of 8:00 A.M. and 5:00 P.M. at BMCC, 2411 N.W. Garden, Pendleton, Ore. A meeting of the Board of Education will be held March 19, 1975, at 8:00 p.m. at BMCC, Board Room (P101) for the purpose of holding a public hearing on this budget. Any person may appear to discuss the budget, or any part of it.
