## Students need SS number

Students and other people who plan to get a summer job shortly should apply now for a social security number if they don't have one, according to Tom McPherson, social security branch manager in Pendleton.

"You should apply for your number several weeks before you need it for a job covered by social security," McPherson said.

"Applications must be screened against central files in Baltimore to make sure that a second number isn't issued to that same person. Screening generally takes several weeks."

More than nine out of ten jobs are covered by social security. People applying for a social security number for the first time may be asked to prove their age, identity, and citizenship.

"Your social security number is yours alone and remains the same for life," McPherson said. "A worker builds retirement, disability, survivors and Medicare protection by work and earnings credited to his social security number. So when you get a job covered by social security, be sure your employer copies your name and number correctly from your social security card to his records."

"If you've lost your social security card, you can get a duplicate by contacting any social security office," McPherson said. "You can get a duplicate faster if you've kept the stub that came with your social security card."

The Pendleton social security office is at 715 S.E. Court. The phone number is 276-3811, Ext. 202.
