Surface Preparations

All surfaces must be clean and free from grease, wax, chalk, and loose scaling paint. Patch all holes and cracks with a suitable patching compound.

Application

May be brushed, sprayed or roller coated. One coat is usually sufficient but two coats are advised for best results. Clean all equipment, immediately after use, with warm soapy water. Provide proper ventilation and heat in cold weather.

Mixing

Stir paint thoroughly. Do not add thinners or similar solvents. If thinning is necessary use a small amount of water.

RECOMMENDATIONS FOR EXTERIOR USE

OLD WORK

Remove all dirt, chalk and grease by washing thoroughly with a tri-sodium phosphate solution. Remove all loose and scaling paint by scraping, sanding and wire brushing to a clean sound surface. On extremely chalky surfaces prime with a mixture of 1 quart of Emulsabond to each gallon of paint.

NEW WORK

On all unpainted surfaces prime coat with a mixture of 1 quart Emulsabond to each gallon of paint. Top coat with material as it comes from the can.

Big Pierre has this paint prepared especially for them. You can be assured that we would not put our good name on the label if we were not positive of its excellent quality. We're proud to announce this paint is now available at all our Lumber Yards. We know you'll like it! Just try it!—we're sure you'll like it! Choose either interior or exterior paint... and you have paint that goes on easy and will last for years. And, best of all, look at this low, low low price! Available only from Big Pierre.
