—Farmers ask decision changes

Farmers in the Sand Hollow and Buttercreek area are asking the Oregon Court of Appeals to set aside an order that will invariably slow and even halt the use of wells in the area.

An order came from the Oregon State Water Resources director on April 2, following a public meeting in February, ruling a critical ground water area of the Buttercreek and Sand Hollow areas.

This order encompassed over 234 square miles. Within this area, the order imposed certain restrictions on certain wells and terminated others, according to the farmers' attorney, Mike Sweeney, Heppner.

The farmers involved are Campbell Ranches, Inc.; Stanley Tucker; Lindsay Farms; Porter-Peringer, Inc.; Larry Hanson; and Taylor Brothers Farms.

After November 1, 1977, Sweeney said, the state is to reconsider a proposal to limit withdrawals from wells in the two areas to 27,000 acre feet per year.

This restriction would limit the amount of water to be used for irrigation purposes. The restriction would protect prior holders on a 'first in time, first in right' priority philosophy. When the 27,000 is used up, Sweeney said, the others might not have enough water for irrigation purposes.

The farmers contend that the director erred in failing to give both legal and adequate notice. They argue that no substantial evidence to support the director's findings concerning boundaries.

The director said that farmers are overdrawing the water in the two areas. The farmers say that the water is in a closed system, trapped underground and that there is no annual recharge. The farmers contend that the water is mining of ground water, like mining gold or silver.

They ask that the director should determine not only the boundaries, but the amount of water in reservoir and that he should consider the economics involved before handing down such a decision.

City council posts set

him to find him a wife who was "poor, but learned" to help him dig for the lost city of Troy. After getting a permit from Turkey, he and his young wife made many digs at the sight of Troy. In his enthusiasm, he passed the third level, which is now considered the old city. They also made digs in the Mycene area and unearthed a circle of graves of royalty, which contained bodies completely covered with gold leaf and faces with solid gold masks. They kept daily diaries and manuals, which he later published in book form and dedicated to his wife. Schliemann was a dedicated archeologist who died at the age of seventy in Italy, far
