8" to 13" block. Our other 8' lathe clipper outfeed, decline to the greenchain and 4-bin

stacker diverter.

A Durand 4-Bin Stacker stacks automatically heart and sap 27's and 54's. With automatic stacking, Kinzua has three greenchain off-bearers on each greenchain and has increased the 54 percentage by 6. These stackers have been a great asset in two ways. They have helped cut costs and increased recovery. On both lines, we have 2-speed drives. When round up or random is going to the greenchain, we run at 220 fpm and when a 54 is clipped, we

speed up to 320 fpm automatically.

To complete the recovery program in the greenend, Kinzua has just purchased a foot saw. It pulls double ended fishtails to get a good, square sawed piece of 4' veneer for lay-up. Supplied also by Durand, this machine features automatic stacking and squaring, also a one-man operation.

Energex System

Two and one-half years ago, as propane costs were steadily increasing, Kinzua installed the Energex Waste-Fuel Sys-

It is with great pride, appreciation,
and gratitude that Morrow County
Grain Growers salutes a giant in the
independent lumber production industry.
