

Track project progressing

The Heppner Lions Club completed another phase of the major improvement plan at the Heppner High School track last week when a permanent cement curb was installed around the track.

During the summer, the Lions Club Track Project crew worked many evening hours setting forms for pouring a cement curb on the inside perimeter of the track. Finally, the Lions Club track

project crew hit on a better idea of using a curb machine and all the forms that were in came out and the inside track area was re-leveled.

On Friday, the final portion of the cement curb was finished. Shockman Bros. donated the cement and time of equipment and driver to the community project. This particular phase of the track project was headed by Jim Wishart. Track coach Dale

Conklin and Bob Abrams were non-Lion workers who had spent many hours of volunteer time on the project in past months.

Nearly 200 man hours were involved in the work associated with the cement curb installation. This work in addition to the Shockman Bros. donation resulted in a project value of \$1,800 for the School District.
