

Spark arresters needed in forest

Effective immediately, inspection of power saws for adequate spark arrestors and screens will be required before permits will be issued at Umatilla National Forest offices during fire season, June 15 through September 30, according to Mac McCurdy, Fire Management Staff Officer.

Spark arrestors and screens must meet Forest Service Standard 5100-1A, and should be so formed and mounted that they will shed sawdust regardless of what position the saw is operated. The spark arrestor should be equipped with a woven wire screen with a maximum opening size of .023 of an inch. These screens

are available at most power saw dealers and saw repair shops.

All power saws used on National Forest lands, whether under such permits or not, must meet the same requirements.

Firewood permits are issued at the District offices in Pendleton, Dale, Ukiah, and

Heppner. Ranger District offices are open Monday through Friday from 7:45 a.m. to 11:45 a.m. and from 12:30 p.m. to 4:30 p.m.

Firewood cutting on the Ranger Districts will be confined to certain designated cutting areas during fire season. Maps showing these areas are available at Ranger District offices.
