President Carter has designated May as Senior Citizen Month.

A fact sheet of pertinent information is to be filled out by senior citizens and put into the vial of life. This vial is to be placed under the top shelf, on the right hand side of the refrigerator.

The availability of this information may well save many lives. It has been used in many areas by emergency personnel for people needing assistance in emergency situations.

The documents will list blood type, family doctor, any chronic illnesses, allergies, medication taken regularly, medical alert conditions, medical social security number, as well as medical insurance policy numbers.

Neighborhood Center personnel have these fact sheets available at the center as well as at the meal sites. Emergency ambulance per-
