

At a time in this country when productivity, or output per man hour, in manufacturing facilities is drastically slipping, we are proud of the Kinzua workers who contributed their best efforts in setting an all time production record of five million board feet at our Heppner sawmill in July, 1979.

With increased productivity, the inflationary spiral faced by all of us can be substantially reduced.

We commend the pride displayed in this accomplishment.

The Executive Committee
Kinzua Corporation
