## CAN YOU STOP IN TIME?

Test engineer records data during the National Safety Council's winter driving tests at Stevens Point, Wisconsin. The annual testing program has evaluated vehicles, tires, tire chains and other equipment under extreme weather conditions.

Pointing up the extreme hazard of driving on glare ice, these tests show that stopping on glare ice may take as much as nine times the normal, dry pavement distance. The tests also disclose that conventional snow tires are of no help in stopping on ice, while studded tires reduce braking distance by 19%, and reinforced tire chains by 50%.

## GOLD facts and fancies

Among the earliest uses of gold were the sculpted figures of rams, frogs and apes worn by ancient Babylonians some 4,000 years ago to ward off illness and evil.

* * *

One of the least-known uses of gold is in radioactive isotopes in biological research and the treatment of cancer.

* * *

One of the most unusual qualities of gold is that neither hydrochloric nor sulfuric acid alone can dissolve it.
