

PUBLIC NOTICES

PUBLIC NOTICE

Nominating petitions are available at City Hall, 188 W. Willow Street, Heppner, Oregon. Official terms expiring for the City of Heppner are the Mayor and four Council positions. The Mayor's position is a two year term, and the Council positions are three (3) four year terms and one (1) two year term. No person is eligible to any elective office to the City of Heppner, who, at the time of his election, is not a qualified elector within the meaning of the State Constitution, and who has not resided in the City of Heppner for one year immediately preceding the election. To be a qualified elector to sign the nominating petition the elector must be registered at the Morrow County Courthouse. With new laws governing the time sequence, and allowing time to certify with the county Clerk, the dead-line for petitions with the City Clerk is 5:00 p.m. Tuesday, August 26th, 1980.

Marshall Lovgren, Recorder
City of Heppner, Oregon

PUBLIC HEARING

The Morrow County Planning Commission will hold a public hearing July 28th, 1980 at the North Morrow County Annex Building in Irrigon at 8:00 p.m.

The purpose of this hearing is concerning the Conditional Use permit requested by Simga Simplot for a trailer park on (30) thirty acres more or less in Tp. 3N R23 section 4 and Tp. 4N R23 section 33-2-2 miles South of I-84 at the 3-Mile Canyon interchange and 13 miles West and South of the City of Boardman.

Interested persons are invited to attend the hearing and express their views. Written, signed statements will be considered. Reasons for approval or disapproval should be included in written or oral statements.

Dorris Graves, Chairman
Morrow County Planning Commission

IN THE CIRCUIT COURT OF THE STATE OF OREGON FOR THE COUNTY OF MORROW

RODNEY L. COLLINS AND DORIS M. COLLINS, husband and wife, Plaintiffs,

vs.
DOUGLAS L. CANNON, a partner doing business as D & V CANNON COMPANY, and GENE GINTHER, defendants

Case No. 6488
PUBLISHED SUMMONS

TO: Douglas L. Cannon and Gene Gintner, Defendants.
IN THE NAME OF THE STATE OF OREGON: You are hereby required to appear and defend the Complaint filed against you in the above-entitled action within thirty (30) days from the date of first publication shown below and if you fail to do so, for want thereof, Plaintiffs will apply to the Court for the relief demanded in the complaint: to wit:

1. For judgment against Defendant Cannon in the amount of \$12,000.00 plus interest thereon at the rate of 9 percent per annum from January 1, 1979, until paid in full; plus the further sum of \$3,500.00 as Plaintiffs' reasonable attorney fees or such other reasonable sum as may be determined by the Court; and for Plaintiffs' costs and disbursements incurred herein.

2. Declaring the lien of the Mortgage foreclosed;

3. Ordering the sale of the property by Morrow County Sheriff;

4. Decreeing Defendant Cannon, and all other persons claiming through or under him, either as purchasers, encumbrances or otherwise be foreclosed of all interest or claim in the real property except any statutory

It is the decision of the Heppner City Council to have the following lights turned off for economic reasons. We have listed them by address or names for your convenience in identifying which lights will be off. If you wish to have your light remain on and pay the charges, please call Columbia Basin Electric at 676-9146. Do not call City Hall. Most lights will cost \$5.00 per month.

The shut off date is Aug. 1, 1980.

Your Fantastic Skin

Skin, the largest organ in the body and one of the most complex, has an area of approximately 17 square feet and weighs about 5 pounds. The skin has from 2 to 3 million sweat glands. You perspire all the time, even when you're not aware of it. Invisible perspiration, which evaporates as quickly as it appears, can total a quart a day.

Your skin serves many purposes—it regulates temperature, warns of dangers in the environment, resists bacteria and eliminates waste. Because it mirrors both physical and mental disorders, skin serves as a general health indicator.

'New guy' spots fire

The Bureau of Land Management office in Portland is quiet late at night. The new guy on midnight shift doesn't make much noise. But the other night he took communications from four other BLM offices about all the lightning strikes hitting Oregon and parts of Washington, California, Nevada, and Idaho. The new guy wrote down the latitude and longitude of each lightning strike, the number of actual strokes in each strike, the exact time of each strike, and then he plotted all the strike locations on a map.

There were more than 1,500 lightning strikes that night, and the new guy recorded them all. The new guy is, of course a computer. He works in BLM's wildfire control section.

He's a Tektronix 4052 hooked up to BLM's Automatic Lightning Detection System. He's got lightning detectors in Prineville, Lakeview, Vale, and Boise. They can pick

up any average lightning discharge within 200 miles. The detectors only pick up negatively charged lightning strokes, but that's about 80 percent in a normal storm. The detectors also know when lightning hits the ground, and ignore the strokes that zap harmlessly between clouds—without starting fires.

The detectors each point out the direction toward a lightning bolt, and tell a position analyzer, another computer, in Vale. The analyzer picks the best two readings, for example so-many degrees northeast of Lakeview and so-many degrees southeast of Prineville. The spot at which the two lines meet is where the lightning hit the ground, accurate to within six-tenths of a mile at a range of 100 miles.

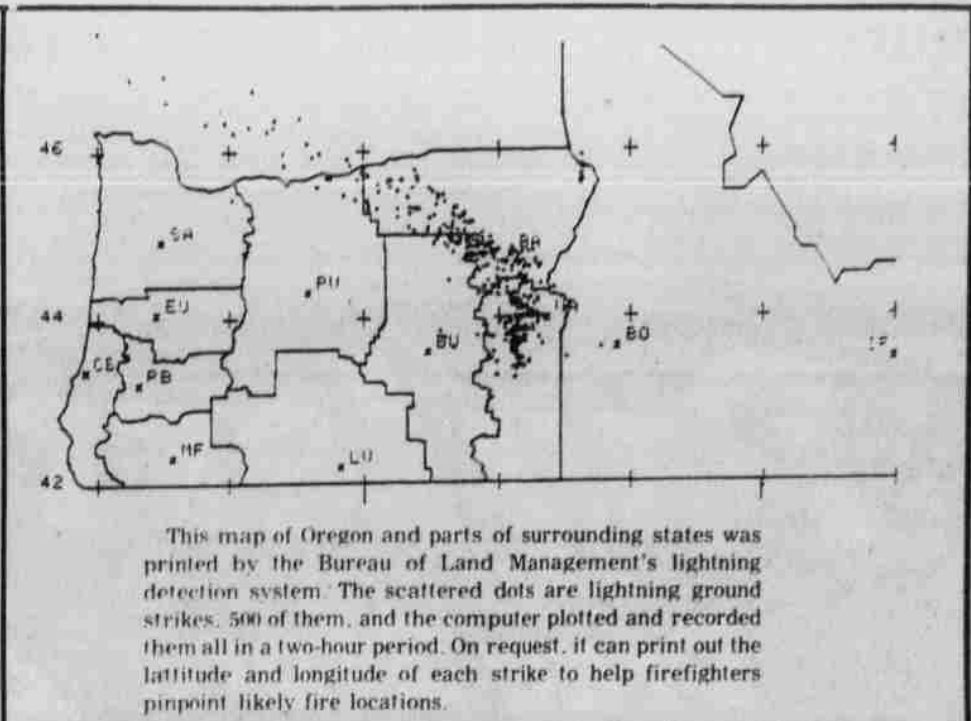

Then, from the maps of their TV-like screens and the printed copies they make, decisions can be made by the men in charge. They may

elect to send observation aircraft, pumbers, or firefighters.

"The main purpose of the system is to concentrate our fire forces in the right areas," says Walt Schopfer, the chief of fire and emergency operations at BLM's Oregon State Office. Then once fires are

found, crews can be dispatched to fight them, he says. This type of system was developed at the University of Arizona, and first used by B.M. in Alaska in 1976. Now, Schopfer says, the eight systems in use almost entirely cover the western states which contain most of the land

BLM manages. Copies of the printouts from the machines are shared too. Besides BLM's district offices, they go to other agencies like the Oregon Department of Forestry, National Park Service, Forest Service, and Bureau of Indian Affairs.

This map of Oregon and parts of surrounding states was printed by the Bureau of Land Management's lightning detection system. The scattered dots are lightning ground strikes, 500 of them, and the computer plotted and recorded them all in a two-hour period. On request, it can print out the latitude and longitude of each strike to help firefighters pinpoint likely fire locations.

Heppner News

Mr. and Mrs. Jim Driscoll, Hemet, Ca., were visiting in Heppner Thursday. The Driscolls were traveling by camp trailer with their grandson, Jeffrey, on their way to Poulsho, Wash., to visit Mr. and Mrs. Tom Driscoll.

The Driscolls are also happy to announce the birth of a granddaughter, Sara Elizabeth, on July 11, to their son and daughter-in-law, Mr. and Mrs. Tim Driscoll of Portland. Sara weighed 6 lbs., 12 oz.

The Fitness Connection

If you're exercising on a regular basis, you're on the way to being fit. The other part of the way is eating right.

According to the President's Council on Physical Fitness and Sports, nutritionists say that Americans consume too many calories, eat too much salt and too much fat. To alter these eating patterns, they recommend that most Americans:

- Eat more fruits, vegetables and whole grains.
- Eat fewer fatty meats and more poultry and fish.
- Cut down on sugar and foods high in sugar content.

Pay Less Drug Store

Prices Effective July 21 thru July 27, 1980
