PUBLISHED SUMMONS
No. 6504IN THE CIRCUIT COURT OF
THE STATE OF OREGON
FOR MORROW COUNTYCITY OF IRRIGON, ORE-
GON, a municipal corpora-
tion,

Plaintiff,

VS.

OREGON LAND & WATER COMPANY, a dissolved Oregon corporation and its successors in interest; TITLE GUARANTEE & TRUST COMPANY, also known as TITLE GUARANTEE & LOAN, a dissolved Oregon corporation, and its successors in interest; Unknown heirs, devisees and successors in interest of HANNAH J. CHAPLIN, deceased; HATTIE WARD; WM. P. ARNOLD; FRED WILCOX; RUTH WILCOX; GREEN ARNOLD; Unknown heirs, devisees and successors in interest of CHARLES R. PENNOCK; LAVERNE T. CHRISTIANSEN; Unknown heirs, devisees and successors in interest of VIOLA D. BERGER, deceased; JUDITH J. BERGER; RONALD LEE BERGER; RICK JOHNSON; MICHAEL JOHNSON; LORA PENNOCK; FLOYD A. BERGER; JOEL W. STAHL and NORMA J. STAHL, husband and wife; ALBERT PARTLOW and LAVELLE PARTLOW, husband and wife; FRANK HANEY and DORIS THELMA HANEY, husband and wife; KIERON J. HANEY and SUSAN K. HANEY, husband and wife; VERNON D. STEWART and MARILYN A. STEWART, husband and wife; JOHN P. EPPENBACH and ANNETTE EPPENBACH, husband and wife; DONALD V. EPPENBACH and DONNA J. EPPENBACH, husband and wife; Unknown heirs, devisees and successors in interest of WILBER V. GIBBS; CELIA E. GIBBS; MARSHALL ALSTON and LISA ALSTON, husband and wife; the unknown heirs, devisees and successors in interest of any of the foregoing defendants, now deceased; and also all other persons or parties unknown claiming any right, title, lien or interest in the real property described in the Complaint herein.

TO: Defendants, Oregon Land & Water Company, a dissolved Oregon corporation and its successors in interest; Title Guarantee & Trust Company, also known as Title Guarantee & Loan, a dissolved Oregon corporation, and its successors in interest; Unknown heirs, devisees and successors in interest of Hannah J. Chaplin, deceased; Hattie Ward; Wm. P. Arnold; Fred Wilcox; Ruth Wilcox; Green Arnold; Unknown heirs, devisees and successors in interest of Charles R. Pennock; Unknown heirs, devisees and successors in interest of Daniel Chaplin, deceased; Unknown heirs, devisees and successors in interest of Hannah J. Chaplin, deceased; Unknown heirs, devisees and successors in interest of Wilber V. Gibbs, deceased; the unknown heirs, devisees and successors in interest of any of the foregoing defendants, now deceased; and also all other persons or parties unknown claiming any right, title, lien or interest in the real property described in the complaint herein.

IN THE NAME OF THE STATE OF OREGON, you are hereby required to appear and answer the complaint filed against you in the above entitled Court on or before the expiration of 30 days from the date of the first publication of this Summons; if you fail so to appear and answer, plaintiff for want thereof will apply to the above entitled Court for the relief prayed for in its complaint, to-wit: For judg-

PUBLIC NOTICES

ment (1) requiring defendants and all persons or parties claiming under them to set forth the nature of their claims, if any to the real property hereinafter described; (2) Determining all adverse claims, if any, of defendants and all persons and parties claiming under them; (3) Declaring plaintiff as owner and entitled to possession of said real property free of any right, title, estate, lien or interest of defendants for those claiming under them and quieting title in said property in plaintiff; (4) In enjoining defendants and those claiming under them from asserting any right, title, estate, lien or interest in said real property or any part thereof; (5) Awarding plaintiff its costs and disbursements to be taxed herein; and (6) Granting such other relief as to the Court may be deemed equitable and necessary.

Said real property is situated in Morrow County, Oregon, and described as follows:

A strip of land 200.0 feet wide situated in the South half of the Southeast quarter of Section 24, Township 5 North, Range 26, E.W.M., in the City of Irrigon, Morrow County, Oregon, being 100.0 feet on each side of the hereinafter described center line of abandoned main track of the Umatilla Branch of the Oregon-Washington Railroad & Navigation Company, as formerly constructed and operated, and extending Westerly from the East line of said Section 24 to the Easterly line of that certain eighth described parcel of land heretofore conveyed by Union Pacific Railroad Company to the State of Oregon by deed dated November 7, 1955, and to the Easterly line of that certain parcel of land heretofore conveyed by Union Pacific Railroad Company to John C. and Arilda A. Swearingen by deed dated December 12, 1955; said center line of abandoned main track being described as follows:

Beginning at a point in said East line of Section 24, that is 611.2 feet north, measured along said East line, from the southeast corner of said Section 24; thence Southwesterly along a straight line forming an angle of approximately 76-degrees 26' from South to Southwest with said East line of Section 24, a distance of 139.9 feet to the beginning of a tangent curve concave Northerly, having a radius of 2864.93 feet; thence Westerly along said curve, through a central angle of 16-degrees 04', a distance of 803.3 feet; thence Westerly along a straight line, tangent to the end of said curve, a distance of 1452.9 feet, more or less, to a point on said Easterly line of said deeded parcels of land, hereinafter referred to, and the terminus of the center line hereby described.

ALSO an irregular shaped strip of land situated in Government Lot 5, in the East half of the Southwest quarter and in the West half of the Southeast quarter of Section 19, Township 5 North, Range 27, E.W.M., in the City of Irrigon, Morrow County Oregon, more particularly described as follows:

Beginning at the point of intersection of the center line of abandoned main track of the Umatilla Branch of the Oregon-Washington Railroad & Navigation Company, as formerly constructed and operated with the West line of said Section 19, which is a point that is 611.2 feet North, measured along said West line, from the Southwest corner of said Section 19; thence North along said West line of Section 19, a distance of 102.9 feet, more or less, to a point that is 100.0 feet distant Northwesterly, measured at right angles, from said center line of abandoned main track; thence Northwesterly along a straight line parallel with said center line of abandoned main track, and forming an angle of

PUBLIC NOTICES

approximately 76-degrees 26' from North to Northeast with said West line of Section 19, a distance of 891.4 feet to the Northwesterly corner of that certain parcel of land conveyed by Union Pacific Railroad Company to Paul DeMauro by deed dated July 14, 1952, U.P.L.S.D.A. 2120; thence Southerly along the Westerly line of said deeded parcel of land, which is a straight line forming an angle of 103-degrees 58' from North-east to South with the North-easterly extension of the last described line, a distance of 83.5 feet to the Southwesterly corner of said deeded parcel of land, which is a point that is 19.0 feet distant Northwesterly, measured at right angles, from said center line of abandoned main track; thence Northeastly, parallel with said center line of abandoned main track, and along the Southeastly line of said deeded parcel of land, which forms an angle of 76-degrees 02' from North to East with the last described line, a distance of 420.85 feet to the Southeastly corner of said deeded parcel of land; thence Northwesterly at right angles to the last described line and along the Northeastly line of said deeded parcel of land, a distance of 31.0 feet to a point that is 50.0 feet distant Northwesterly, measured at right angles, from said center line of abandoned main track; thence Northeastly at right angles to the last described line and parallel with said center line of abandoned main track, a distance of 2352.76 feet to a point that is 50.0 feet distant Northwesterly, measured at right angles, from a point on said center line of abandoned main track that is 3669.0 feet distant Northeastly, measured along said center line, from the West line of said Section 19; thence Southeastly at right angles to the last described line, a distance of 100.0 feet to a point that is 50.0 feet distant Southeastly, measured at right angles, from said center line of abandoned main track; thence Southwesterly at right angles to the last described line and parallel with said center line of abandoned main track to a point on the North line of the Southwest quarter of the Southeast quarter of Section 19; thence Easterly along said North line to a point thereon that is 100.0 feet distant Southeastly, measured at right angles from said center line of abandoned main track; thence Southwesterly along a straight line parallel with said center line of abandoned main track, a distance of 1433 feet, more or less, to a point on the Southeastly extension of the Northeastly line of said parcel of land conveyed by deed dated July 14, 1952; thence Southeastly along said Northeastly line extended Southeastly, a distance of 50.0 feet to a point that is 100.0 feet distant Southeastly, measured at right angles, from said center line of abandoned main track; thence Southwesterly along a straight line parallel with said center line of abandoned main track, a distance of 1340.37 feet, more or less, to a point on said West line of Section 19; thence North along said West line of Section 19, a distance of 102.9 feet, more or less, to the point of beginning.

This Summons is published by order of the Honorable William W. Wells, Judge of the above entitled court made and entered on the 14th day of November, 1980, directing publication of this Summons

once each week for four consecutive weeks in Heppner Gazette-Times, Heppner, Oregon, a newspaper published and of general circulation in Morrow County, Oregon. The date of the first publication of this Summons is November 20, 1980.

PUBLIC NOTICES

The answer must be given to the Court Clerk or Administrator within 30 days from the date of first publication specified herein along with the required filing fee.

NOTICE TO DEFENDANTS:
READ THESE PAPERS CAREFULLY!

You must "appear" in this case or the other side will win automatically. To "appear" you must file with the Court a legal paper called a "motion" or "answer". The "motion" or "answer" must be given to the Court Clerk or Administrator within 30 days along with the required filing fee. It must be in proper form and have proof of service on the plaintiff's attorney or, if the plaintiff does not have an attorney, proof of service on the plaintiff.

If you have questions you should see an attorney immediately.

Wranglers
hold
Christmas
potluck

The Wranglers Riding Club held a Christmas potluck meeting in Heppner at the fairgrounds on Dec. 7.

The Roger Britt family hosted the occasion and Santa Claus visited the group, leaving presents and candy.

A meeting followed the dinner where the 1981 officers were elected.

New officers are as follows: president - Anne Schwarz; vice president - Gail Papineau or Bobbie Angell; secretary - Debora Palmer; treasurer - Sherry Kemp; directors - Lee Palmer and Bobbie Angell; Horse show chairman - Merlyn Robinson.

The Wrangler's Horse Show section of the Fair Premium Book will be updated and the rules for 1981 will be made explicit.

Anyone with opinions, or suggestions please contact Merlyn Robinson who is in charge of this, said a club spokesperson. "We really need your help in this to make our 1981 show a bigger success and so it will run smoothly."

Some discussion was heard on whether to combine the horse show and games or have just a horse show.

The Cowboy Breakfast held on the Sunday morning of Rodeo week is the club's one and only money making project for the year. This money is used for grounds maintenance and repairs, said a club spokesperson.

Plans are in progress now for this event.

Members should be thinking about what you would like to work on for the breakfast as it will soon be here.

Discussion about the club's sponsoring of an open jackpot rodeo this summer was held. It was decided to continue this at the next meeting for further plans.

The meeting was adjourned and a big thank you is extended to the Roger Britt family for hosting the evening.

A board of directors meeting will be held in January.

"Merry Christmas, and happy holidays to everyone," The Wranglers Riding Club.

Researchers test effect of volcano on livestock

Researchers at Burns and at other western sites are working together investigating how Mount St. Helens might affect rangeland and the livestock industry including studying how well cattle can digest forage covered with ash.

Forrest Sneva, a USDA range scientist at Oregon State University's Eastern Oregon Agricultural Research Center at Burns, is coordinating Oregon, Idaho and Nevada researcher's studies of the impact of Mount St. Helens ash on the growth of range forages, water infiltration in rangeland and cattle's ability to eat food mixed with ash.

The forage growth research is being conducted at OSU's Squaw Butte research site west of Burns and at the University of Nevada at Reno. A water infiltration study is underway at Squaw Butte; the cattle study is underway at OSU's Union agricultural research facility near La Grande, and USDA scientists at the Snake River conservation Center at Kimberly, Idaho, have contributed to the research by analyzing the physical and mineral properties of ash used in the tests.

Sneva, who trucked loads of ash from several parts of western and eastern Washington just two weeks after Mount St. Helens exploded May 18, said he had identified no major problems in forage growth.

"There appears to be a slight reduction in yield in a plot of crested wheatgrass we covered with ash from the Moses Lake area (in eastern Washington). But so far there's no indication of toxicity or anything like that," Sneva said.

The scientist explained that

the ash that reached eastern Washington last May was lighter and fluffier than ash that fell closer to Mount St. Helens. He said the fluffier ash "stands up higher" on rangeland plots and he speculated that it may be harder for range grass seeds to germinate and grow shoots through the fluffy ash than through heavier ash obtained from areas such as Yakima, Wash., because the shoots have farther to go to break into the open.

OSU range scientist John Buckhouse, who is conducting the water filtration study using a rainfall simulator device on plots covered with ash from several areas, said early tests suggest lighter ash that fell in eastern Washington may cause more infiltration problems and greater sediment runoff than heavier ash from western Washington. However, firm conclusions cannot be drawn from the study yet, he said.

Martin Vavra, an animal scientist at OSU's Union research facility, is supervising experiments with how well cattle digest dusted forage and grain mixed with ash.

Using steers fitted with plastic tubes in the side of their stomachs, the Union researchers are testing how well cattle digest range forage, alfalfa and grass hays and combinations of alfalfa, hay and grain mixed with varying quantities and types of Mount St. Helens ash.

The researchers also are using digestive fluid obtained from the animals to run laboratory tests on how ash affects the digestibility of various forages.

Vavra expects to complete the work and analyze the data

by the first of the year. Sneva, project coordinator, and the other researchers will present a report on initial findings at a meeting of the International Range Society in Tulsa, Okla., in February.

Sneva said the research, being funded through the general operating budgets of the scientists, probably will continue for years.

"We'll be looking at these ash test plots at Squaw Butte for 15, 20 maybe 25 years," he said.

The USDA scientist said he decided to conduct the range forage work at Burns shortly after Mount St. Helens erupted and spewed ash through the northwest and other parts of the country last May. "I knew they wouldn't be able to

get a pure control situation up there in Washington. Every place would be contaminated with ash," he said.

Also participating in the joint research are Hank Mayland, a USDA researcher at the Snake River Conservation Center in Idaho, and Ray Evans and Jim Young, USDA scientists studying the effect of ash on seed germination at the University of Nevada's Renewable Resource Center in Reno.

Carlton Britton, a Texas Tech University range scientist formerly employed at the Oregon Agricultural Experiment Station's eastern Oregon branch station at Burns, helped Sneva coordinate the project and is helping analyze collected data.
