

## Around About

By Justine Weatherford

By now many of our shining New Year's resolutions are either already broken or about forgotten. This may be partly because of last week's deep freeze which made it hard to stay with a pre-set schedule when so many meetings were canceled or postponed.

However our public schools re-opened and the BMCC winter classes began on time enrolling interested learners who are grateful for the assortment of classes offered in this away-from-the-main-highway area.

A great collection of beautiful pictures of Australia was shown and narrated at last week's Chamber of Commerce luncheon meeting by Chris Donaldson. They certainly took minds off of Heppner's chill. AFS student Chris, who is staying in the Bob Abrams' home, quickly had her viewers and listeners thinking of visiting her home continent down under.

New Chamber President Bob Harris announced committee chairmen for the year and urged them to form their committees and to be ready to really get functioning. Bob and Mrs. Harris moved to Heppner because they really like this area where Babe lived in her early years and where they had come to hunt during their residence in Toledo, Oregon. Bob is a strong believer in the importance of a local Chamber of Commerce. He says "I would like to talk to anyone about programs here that would strengthen the chamber and better this area."

Do you realize that business men's associations existed in the days of the Roman Empire? The first group to have the name Chamber of Commerce was organized in Marseille, France, in 1599, 383 years ago. Such groups promote the interests of members and of business in general. In some European countries chambers of commerce are official agencies, supported by taxes. The International Chamber of Commerce is working to bring about closer international economic ties.

Chambers work to bring new industries to their communities partly by furnishing information about their locations that may help those who might move into their areas. "In the U.S. a chief purpose of the organization is to improve and protect the free enterprise system, and also to work at developing private-business programs to help solve social and economic problems" according to the "World Book Encyclopedia."

Only when all business people work together can a chamber effectively lead a community forward. In Morrow County it is well known that the economy is based on agri-business and forestry with the recent additions of food processing and energy production. These activities bring considerable money here where some of it is spent. The Chamber of Commerce greatly needs more participation by representatives of these basic activities.

The wisdom provided by government and school district personnel and doctors, lawyers and clergy contributes significantly to the strength of the organization. This winter the group here has sorely missed the attendance of two veteran members, Oscar Peterson and Orville Cutsforth, both of whom have been ill.

The Chamber of Commerce of the United States was organized in 1912 during President Taft's administration; its headquarters are in Washington, D.C.

One most encouraging sign of upward movement here came last week when Doug Smith, the new owner of Heppner Bowl, came to the first meeting of 1982 saying "I wish to join you. I am volunteering to serve on a committee." Doug and Mrs. and Mrs. Smith have been here less than a year, but have already made many friends. Maybe the new year, the newly installed officers, and the important continuing integration of many fine, comparatively new members, such as Ron McDonald, Ralph Limanen, David Sykes, Fred Toombs, C.W. "Hutch" Hutchinson, Bob Costa, Kristy Lovgren, Kenneth Miller, Tom McElligott, the Rev. Ed Watts and Doug Smith, with their fresh ideas and leadership abilities will bring the local organization to a position where it can better unify, serve and strengthen the business communities of this country.

During these winter months many of us have more hours to watch TV. This week Channel 10, PBS, began presenting a tremendous 13-part BBC series, "Life on Earth," which in England ranked in ratings "only behind Queen Elizabeth's coronation, the Apollo II moon landing and the recent royal wedding." The series covers the beginning of life up to the present, closely following Evolution patterns. If you missed the first episode on Tuesday evening at 8 p.m., each program will be repeated at 7 p.m. the following Sunday.

## Heppner JV boys lose a pair of ball games

The Heppner junior varsity boys' basketball team lost a pair of games over the weekend.

The Mustang JV's lost 34 - 32 to Riverside Friday night, January 8, and 55 - 46 to Pilot Rock Saturday night.

Against Riverside, Heppner led at halftime 15 - 14 in a slow-paced game, but a lapse in the fourth quarter allowed the Pirates to pull away and lead by as many as nine points. However, the Mustangs closed with a rush of points at the end of the game and actually had a chance to tie the game in the last minute, said Coach Brent Eggers.

Heppner had one more field goal than Riverside, but lost it at the foul line by converting just eight of 18 free throws.

Sid Kennedy led the Mustangs in scoring with eight points and in rebounds with 10. Kennedy and Shane Laughlin led Coach Brent Eggers' special rating system with +6 ratings.

According to Eggers, another thing that hurt Heppner was committing 32 turnovers.

"We missed an unbelievable amount of easy shots," said Eggers. "We put the ball on the floor too much instead of passing it, which resulted in many turnovers. Our team defense was very good, particularly in the first half."

In the Pilot Rock game, the Heppner starters spent much of their time on the bench as the team committed 33 fouls, resulting in five Mustangs fouling out. Pilot Rock had 12 fouls in the ball game.

Heppner continued its turnover problem, turning the ball over 31 times, Eggers said.

## Bids set for county projects

Bids will be received by the Oregon Transportation Commission on Thursday, January 28 for 12 projects estimated to cost \$3.4 million, stated a recent news release from that department.

Two of the projects are scheduled for Morrow County.

The first project calls for replacement of the existing narrow timber Blackhorse Creek Bridge on Arcade Street in Lexington. It will be replaced by a wider concrete slab structure. Completion time is 180 calendar days, said the news release.

A second county project involves grading and paving on the Juniper Canyon Road - Lexington - Echo Highway section of Bombing Range Road, with the project ending approximately 9.7 miles northeast of Lexington. The project is 2.48 miles long and the paved width is 30 ft. Completion time is 210 calendar days, the news release concluded.

## Lone JV team defeated by Helix Grizzlies

By MICHELLE LARUE

Helix 39: Fisch, Newton 4-0-0, R. Roakin 6-3-3-15, Gibbs 2-0-0-4, Lembecke 7-2-4-16, Baird 5-1-3-11, Brownen 0-1-2-1, Rydrieh, Boyer 2-0-0-4

The Lone JV team was defeated 33 - 39 by the Helix Grizzlies on Friday, January 6.

The Cardinals were outscored badly in the first half as the Grizzlies jumped out to a 4 - 16 first quarter lead. The Grizzlies moved their lead to 27 at the half, 10 - 37.

The Cardinals had a better second half as they held the Grizzlies to 12 points in the third quarter, to make the score 20 - 49 at the start of the final quarter.

The Cardinals outscored the Grizzlies in the last quarter but not by enough.

Lone 33: Padberg 1-0-0-2, Meyers 4-0-0-8, Leavitt 3-2-2-8, McElligott 2-0-0-4, McCabe 0-1-2-1, Douglas, Love, Childers 4-0-0-8, Doherty, Ball 1-0-0-2, Colvard

The oldest coin mint in the Western Hemisphere is the Casa de Moneda de Mexico, world-renowned for over four centuries for the quality and craftsmanship of their coinage. Recently, Banco de Mexico, the government's federal reserve, commissioned three new coins - the first gold bullion coins in 60 years - from the Casa de Moneda. The new coins are the Mexican one-ounce; the Mexican half-ounce and the Mexican quarter-ounce. They could make enduring and original gifts of gold.

**CAR CARE CORNER**

Tips For More Safety, Economy, Convenience

Working on your car yourself can be safe and satisfying and money-saving, if you observe basic precautions.

These safety tips are featured in the Reader's Digest Complete Car Care Manual:

• Never work on a car if you're tired, sick, intoxicated or on drugs.

• Never run the engine unless the work area's well ventilated. Better still, never run the engine unless the car's outdoors.

• Don't work near hot exhaust manifolds, mufflers, pipes, hoses, radiators or other car parts that run hot.

**LET US SIPE YOUR TIRES**

Fine cuts are made by a special motor-driven blade across the tread face of your tires to provide:

- More gripping edges which reduce spinning and shorten braking distances on wet or icy surfaces.
- Cooler running on dry surfaces, increasing the life of your tires.
- Reduced road shock for a smoother ride.

John Smith, Les Schwab service man, demonstrates siping machine at Heppner store. Razor-sharp device makes fine cuts in tires.
