

Heppner woman gets bird's eye view of Mt. St. Helens

Mary Goheen of Heppner took this photo as she flew over Mt. St. Helens during a flight to Seattle, Wash., in April. This excellent view of the steam vent inside the mountain's crater was taken with a 35 mm camera through the plane's window.

133,000 acres in Eastern Ore. to be sprayed for budworm

Aerial spraying of 133,000 acres in eastern Oregon for an infestation of the western spruce budworm is scheduled to start June 17 and last about three weeks, according to state and federal forestry officials.

Oregon State Forester H. Mike Miller and USDA-Forest Service Regional Forester Jeff M. Sirmon said the project is in an area near the communities of John Day, Heppner and Ukiah. The spray area was trimmed to 133,000 acres from 208,000 acres because of a lack of funds to do the entire project.

The project, the two officials said, is expected to be effective in controlling the budworm despite the smaller area being treated. About 124,000 acres will be treated with Sevin 4-0il, a chemical used on pets, in yards and gardens, and for mosquito control. Registered and approved by the Environmental Protection

Agency, Sevin 4-0il has been used in effective control efforts against the budworm in eastern Washington in 1977 and in eastern Oregon in 1979.

Nearly 9,000 acres will be treated with the chemical Orthene. This acreage is in a watershed where the two forest management agencies feel extra precautions must be taken to protect aquatic insects vital to the diet of young Chinook salmon.

Low concentrations of budworm populations are always present in Douglas fir, true fir, and Engelmann spruce species. Foresters say the insect populations have reached proportions that control measures must be taken to avoid unacceptable tree growth loss and tree mortality.

With advice from the Oregon State Department of Fish and Wildlife, a program to monitor the project will be

undertaken simultaneously with the spraying.

The spray project is being conducted by the Oregon Department of Forestry and the Forest Service on 17,000 acres of private land and 116,000 acres of Umatilla and Malheur National Forest land. Project headquarters will be in John Day, with a satellite entomological office located in Ukiah.

The spray project is under the direction of Randall Perkins, pesticide use coordinator from the Forest Service regional office in Portland.

All costs incurred to treat federal lands will be paid by the federal government. The State of Oregon and U.S. Government each will pay 12 1/2 percent of the cost on private lands, and private landowners on a voluntary basis will pay the remaining 75 percent of the treatment costs, said the officials.

Lexington grads hold 62 year reunion

The three members of the 1920 graduating class of Lexington High School held a 62 year class reunion on Sunday, June 6. The three graduates were Mary Thompson, Luella Cummings and Lowell McMillan. The group met at Luella (Cummings) Schiewe's home at Molalla to celebrate with a potluck picnic, and to reminisce, said class member Lowell McMillan.

Mary Thompson married Elmer Hunt in 1925 and made a career teaching elementary

education. The couple lived in Lexington, The Dalles, and later retired in Eugene, where Mr. Hunt passed away last year. They had two daughters, Louise and Clair, and have six grandchildren and four great-grandchildren, McMillan said.

Luella Cummings married Albert Schiewe in 1920. They farmed in the Molalla area until retiring to live in Molalla. The Schiewes have three children, William, Jeni and Grant, and have four grand-

children and four great-grandchildren.

Lowell McMillan graduated from Oregon Agricultural College (now Oregon State University) in 1927. He married Goldie Betts and they moved to Maryville, Calif., where he began a 38 year teaching career. The last 30 years of his career, he taught in the San Francisco, California school system. He retired in 1964. He and his wife now live at Woodburn.

Heppner Garden Club receives flower arranging instruction

By JUSTINE WEATHERFORD

Bebe Munkers was hostess for the June meeting of the Heppner Garden Club on Monday evening, June 14. After enjoying a potluck dinner, members were instructed about flower arranging by Carolyn Cole of the Posey Patch in Heppner. A business meeting followed the program.

Mrs. Cole demonstrated building a triangular arrangement composed of yellow gladioli and white daisies on a

white compote vase. She also showed illustrations of other types of arrangements, circulated several helpful books on arrangements, gave each person a small flower selection guide and answered questions.

Newly installed club president Theta Lowe presided at her first monthly business meeting. On the recommendation of Yard of the Month committee members Irene Swanson, Dr. W. Wolf and Eleanor Gonty, the club voted to name the gardens of Daisy and Bill Collins as the winning yard for the period from June

15 to July 15.

Details concerning the flora-culture awards for the county fair and plans for the fall district 10 meeting in Heppner were discussed. The garden clubs of the county will again give special awards at the fair, and it is planned that the district meeting will be held at St. Patrick's Catholic Church on Saturday, Sept. 25.

The July meeting of the club is to be another potluck dinner at the home of Babe Harris on July 12. That evening's program will feature the growing and use of herbs.

Riverside junior named winner of prestigious language award

Tammy Lachner

Tammy Lachner, a 17-year-old senior at Riverside High School, was named the 1982 winner of the National Language Award. She is the first Heppner resident to win this honor. The award is presented annually to a high school senior who has demonstrated exceptional ability in a foreign language.

School Board to meet

The Board of Education of the Boardman School District will meet on Thursday, June 17, at 7:30 p.m. in the Boardman High School. The agenda includes reviewing the minutes of the previous meeting and discussing the proposed budget for the coming year.

County, school district seek voter approval on tax bases

The Boardman School District and Morrow County are seeking voter approval on tax bases. The district is requesting a 1.5% increase in the property tax rate, while the county is requesting a 0.5% increase. The voters will be asked to approve or disapprove these increases at a public hearing on June 22.
