

IUCC sponsors workshop

Don Eaton, a nationally known singer-songwriter and workshop leader from Portland will be in lone September 29-30 to present a workshop and a concert.

A workshop on "Communication and Personal Growth" will be offered on Saturday, September 29, from 9 a.m. to 4 p.m. The lone United Church of Christ is sponsoring the event for everyone interested in improving their communication skills announced a spokesperson for the Church.

Cost of the workshop is \$15 per person, or \$25 for two from the same family. Scholarships are available. Child care will be provided, and lunch will be available for \$1 donation. For more information, or to preregister, call Rev. Cathy Barker at 422-7530.

On Sunday, September 30, Don Eaton will present a solo concert at 7:30 p.m. at the lone United Church of Christ. Admission will be \$3 for adults, \$2 for youth 12 and up, and \$1 for children under 12, maximum for a family is \$7.

Lions golf tourney to tee off Sunday

The annual Heppner Lions Men's Golf Tournament will tee off at 8 a.m. Sunday, September 23 at the Willow Creek Country Club, stated a spokesperson for the Lions.

The tournament is to benefit the Oregon Lions Sight and Hearing Foundation and the Heppner Swim-

ming Pool Solar Heating Program. Entry fee is \$10 and the tournament is open to the general public.

Local golfers are asked to sign up at the club house. Out of town golfers may sign up by calling John Edmundson at 676-5177 or 989-8202.

FFA officers elected

By NOELLA RILL

The Heppner Chapter Future Farmer of America held their annual officer election meeting last Tuesday evening, September 11, at 7:30 p.m., in the vo-ag room. The

results of the election were as follows: President, Andrea Ball; Vice-President, Susie Martin; Secretary, Dorothy Hays; Treasurer, Travis Harrison; Reporter, Noella Rill; Sentinel, Loran Hayes.

Crop Report

Production of winter wheat in Oregon is estimated at 66.2 million bushels based on conditions as of September 1 reports the Oregon Crop and Livestock Reporting Service. This is the same as the August 1 forecast, but is an increase of nearly seven percent from the 1983 crop. The average yield per acre for the 1984 winter wheat crop is a record 63.0 bushels, 1.0 bushel more than last year. Acreage for harvest is estimated to be 1,050,000 acres, five of 1,000,000 acres. All wheat production, including spring wheat, totals 69.2 million bushels or almost six percent higher than 1983 production. All wheat production for the entire United States is forecast at 2.57 billion bushels, six percent more than 1983, but seven percent less than 1982's record high production.

Oregon's barley production is estimated to be 15.4 million bushels, off seven percent from 1983. The average yield per acre, at 64.0 bushels, is 3.0 bushels higher than last year. Acreage harvested declined 11 percent to 240,000 acres, which more than offset the increased yield.

Forecasts of other Oregon field crops as of September 1, are: production of oats at 7.0 million bushels is the same as the August 1 forecast, but 16 percent greater than in 1983; sugar beet production at 325,000 tons is also the same as the August 1 forecast, but three percent

higher than last year's total; the estimate of hop production also remained the same as that of August 1 at 7.8 million pounds, or 22 percent less than in 1983.

Oregon's filbert production is forecast at 13,700 tons, 71 percent above a year ago, but 26 percent below the 1982 crop. Total filbert production, including Washington, for 1984 is expected to be 14,000 tons.

Production of prunes and plums in Oregon is estimated to be 19,000 tons, the same as the August 1 forecast, but 32 percent below last year's 28,000 tons. Nationally, except California, prune and plum production is expected to total 53,400 tons, 14 percent below 1983's total.

Oregon Bartlett pear production is estimated at 41,000 tons compared with 63,000 tons in 1983. Production of all other pears in Oregon is forecast at 115,000 tons, eight percent less than last year's production of 125,000 tons. For the three Pacific Coast States all pear production is forecast at 643,500 tons, 12 percent less than in 1983.

Oregon strawberry growers are estimated to have produced 607,000 cwt., a drop of 24 percent from 1983 production. Yields declined 20 percent, to 92 cwt. per acre from 1983's record of 115 cwt. per acre. Harvested acreage also declined to 6,600 acres from the 6,900 acres harvested in 1983.

Former lone woman does well at Idaho Barrel Race

Patti McCain of Olex, formerly of lone was a big winner at last weekend's Barrel Racing Futurity in Caldwell, Idaho.

According to Patti's mother, Pat Pettyjohn of lone, she received two

horse blankets, a silver mounted head stall, an Idaho barrel racing futurity jacket and some money. Her awards were for her winning in the amateur barrel racing, placing second in the open barrel racing and seventh in futurity barrel racing.

FFA urges farm safety

The Heppner Future Farmers of America Chapter urges everyone to stop and think about farm safety during National Farm Safety Week September 16-22. In addition the chapter would like to share the following information from the National Safety Council on how to reduce farm accidents.

The National Safety Council recommends several management principles to reduce farm accident risks:

- Get a handle on your farm's hazards. Make a list of things and work practices with hazards that could be removed or controlled. A detailed farm hazard survey form available from your county Extension office will help you make a thorough safety evaluation.

- Maintain equipment in good working order. Keeping all safety shields and guards in place prevents tragedies.

- Stay alert and on top of things by being physically and mentally ready to deal with danger. Seek medical care for health problems that impair work efficiency and alertness.

- Warn children, the elderly and visitors of dangerous areas; and, if necessary, keep them out of the areas.

- Train everyone on the farm to handle serious injuries. This will prevent further injury and even death in many cases.

- Keep up-to-date. Learning how to control and eliminate hazards is a continual educational process for everyone on the farm. The experienced worker should study the safe operating procedures of any new equipment, chemicals, work procedures or other changes. New or inexperienced farm workers should be thoroughly trained. Educational materials and classes are offered through county Extension offices, vocational-agricultural programs, farm organizations, and insurance companies.

Exercise through sports can be fun for a child, and important in body development.

Registered and Certified HILL '81 - STEPHENS SEED

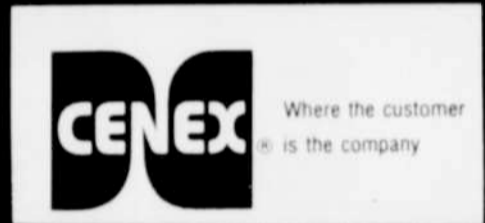

EARLY BUYERS! This year I am offering a 30 cent cwt price discount for any seed bought before September 20th. As I base my seed price on the Portland market I want to pass on the storage and interest savings of buying early.

ALL CUSTOMERS! You have a lot invested in a crop. Your cheapest insurance in purchasing clean seed is a shipping certificate. It is not O.S.U. Registered or Certified if you do not receive an O.S.U. shipping certificate.

I only sell what I grow. I only sell O.S.U. Registered or Certified. I personally make the last roguing pass through each field, and I now personally clean or supervise the cleaning and sizing of each seed lot. Give me a call or come out and see me. I would like the opportunity to supply your wheat seed.
