**Dream About A Blaze King.**

Blaze King catalytic stoves are a wood-burner's dream of efficient, hassle-free, clean heat. Efficient—Blaze King's King catalytic stove is almost 77 percent efficient\*, which means you actually save one third of every cord of wood. At that rate, a King catalytic can pay for itself in two or three years.

Hassle-free—A Blaze King eliminates the hassle of continually feeding the fire. The King catalytic's large firebox can be loaded with wood and left to burn all day...over 24 hours on a single load of wood. A dual fan system quietly moves heated air through the stove and out into the room. And the automatic thermostat gives you even, comfortable heat without the constant fiddling with draft controls that other stoves require.

Clean—Best of all, Blaze King catalytic stoves burn cleanly. A uniquely-designed catalytic combustor system reduces creosote by 90 percent, so your chimney stays cleaner, longer.\*

So, if you're tired of hauling and chopping wood, tired of feeding the fire, tired of cleaning your chimney, tired of the neighbors complaining about smoke...remember you can rest easy with a Blaze King.

*Less mess, less fuss, more heat*
