Sheriff advises buckle up for

"It's back to school time," says Sheriff Roy Drago of Morrow County, "and let's get our children back safely."
When driving to school, responsible drivers and wise passengers know to buckle their seat belts.
"There are many excuses that people use for not buckling their seat belts," Sheriff Drago says, "but seat belts are needed any time you get in the car."
All driving can be dangerous. And it's important to wear seat belts even if you are traveling at a low speed or going only a short distance. According to studies, more than half of the accidents causing injury or death occur at speeds less than 40 mph. Fatalities involving non-belted occupants have been recorded as low as 12 mph - the speed you'd be driving in a parking lot. Three out of four accidents causing death occur within 25 miles of home. Therefore, seat belts are needed for both short and long trips.
It is false to think that by not wearing seat belts you could be saved if you are thrown clear of the car. The probability of death is almost five

times as great when the motorist is thrown from the car. Under almost any set of collision circumstances, people are better off belted up inside the car.
The driver and all passengers need to wear seat belts in the car. The forces in a collision can be so great as to fling an ejected person as much as 150 feet, approximately 15 car lengths.
Motor vehicle collisions are the number-one killer of young children. Whenever you, your children, or others get in your car, make sure everyone has buckled their seat belts before you take off. "Let's all stay safe," says Sheriff Drago.

Hospital Notes

Pioneer Memorial Hospital reports admitting and discharging the following patients during the past week:
Rudy Bergstrom, lone - admitted Sept. 29, discharged Oct. 1;
Alice Anderson, Heppner - admitted Sept. 30, discharged Oct. 1;
Homer Robins, Lexington - admitted Oct. 2, still a patient as of Oct. 7;
Scott Jones, Heppner - admitted Oct. 2, discharged Oct. 4;
Tom Gonty, Heppner, Rachel Dick, Heppner, and Sheri Warnock, Heppner all admitted Oct. 6 and are still patients as of Oct. 7.

It is with sorrow I must announce that I will no longer be hairdressing as I am moving. My last day for appointments will be Oct. 11. I have enjoyed working in Heppner and have many fond memories. It has been both a joy and a pleasure to serve this community. I will miss all of you and think of you often. Thank you for your loyalty and support.
Patti Nairns

School Lunch Menu

Heppner Elementary School
Monday, Oct. 13 - Columbus Day Special.

Tuesday, Oct. 14 - soup, sandwich, vegetable, dessert and milk.

Wednesday, Oct. 15 - Mexican casserole, vegetable, cinnamon bread, fruit and milk or salad bar and milk.

Thursday, Oct. 16 - brunch.
Friday, Oct. 17 - fish and chips, cole slaw, dessert and milk.

Ione School
Monday, Oct. 13 - burritos, stuffed celery, cheese sticks, seasoned vegetables, dessert, milk.

Tuesday, Oct. 14 - stew, hot rolls, pear and cheese salad, dessert, salad bar, milk.

Wednesday, Oct. 15 - creamed tuna over biscuits, apple wedges, brownies, salad bar, milk.

Thursday, Oct. 16 - cowboy macaroni, hot rolls, tossed salad, dessert, salad bar, milk.

Friday, Oct. 17 - tomato rice soup, chopped pork sandwiches, peanut butter sandwiches, pickles, crackers, dessert, milk.

Tue., Oct. 14 - Lexington City Council, City Hall, 7:30 p.m.

Look into the facts about Measure 14, and find out why...

... people all over Oregon are concerned about '14' - the proposal to shut down the Trojan electric plant.

Because Measure 14 simply makes no sense.

Shutting down Trojan - an operating nuclear power plant which has reliably and economically produced about as much electricity as Bonneville Dam for more than ten years - would provide no real benefits to Oregonians and would lead to negative environmental and economic consequences. A shutdown of Trojan is drastic and unwarranted. It simply makes no sense.

■ I've studied this issue from a scientific standpoint. Measure 14 would be of no benefit to the people of our state. Shutting down a proven operating electric plant is a drastic approach that makes no sense. As a scientist and as a citizen of Oregon, I'm voting NO on Measure 14... and I urge you to vote NO, too. ■

Dr. Mary Forbes, Chair
Department of Physics
Pacific University

Because of the impact on Oregon's environment.

Even using conservation, cogeneration and renewable resources, new coal plants would be the backbone of any program to replace Trojan's electricity. And we would face the potential need to dam many of Oregon's remaining free-flowing rivers and streams in order to build new hydro-electric plants. As a result, Oregon's environment would suffer significantly.

■ As an Oregonian with a deep commitment to our state's environment, I strongly oppose Measure 14. How will we replace the electric supply which comes from Trojan? Two things are most likely - more dams and more coal use. Measure 14 will be bad for the environment. Please vote NO. ■

Philip W. Schneider
Board Member
National Wildlife Federation

Because of the impact on consumers' electric bills.

Shutting down Trojan would increase Oregonians' electric bills because electricity from Trojan is far less expensive (2.6¢ per kilowatt hour) than electricity that would have to be used (which costs up to 7¢ per kilowatt hour) to replace Trojan's electricity. There is no surplus of reliable electricity at Trojan's predictable low cost.

■ Measure 14 would close one of our cheapest sources of electricity. It is estimated that the cost of replacing Trojan's power would be over a billion dollars. We're the one who will pay - every month in our utility bills. Higher utility rates caused by shutting down Trojan will hurt everyone - including those living on fixed incomes. Before you vote, please think about the price tag for all Oregonians, especially those least able to pay. ■

Jean Young
Mayor of King City and Senior Activist

Because of the impact on Oregon's economy.

Shutting down Trojan means the immediate loss of hundreds of jobs, and the state-wide economic impact of the Trojan shutdown would place thousands of more jobs at risk. Closing Trojan at the cost of jobs and higher electric bills would unnecessarily hurt Oregon's economy.

■ We've all worked hard the last few years to rebuild Oregon's economy because we all have a stake in Oregon's economy and its future. Measure 14 isn't a game. If this drastic measure passes, we'll all pay the price. Measure 14 is a step backward that none of us can afford to take. ■

Dr. James E. Reimuth, Dean
College of Business Administration
University of Oregon
